

MIRA TABLE

Design Daniele Merini

**Materials**

- Lacquered Glass

**Table Finish**

Frost Lacquer

**Mira Table -**

Characterized by an organic quadrilateral structure supported by shaped elements in glossy finish. By combining several tables, it is possible to obtain different combinations that allow to adjust the function according to necessity: individually, it is a perfect occasional table; instead, two of them create an ideal dining table; while composed in the circular shape, they will become optimal supports for meeting and conferences. Struck by light, Mira Table creates wonderful chromatic effects, creating a dynamism of projections.
