## Hcb Beech Coat Stand

2006

### FINISHES

Structure Finish - Wood

Bois Blond  
Beech

Whitend  
Beech

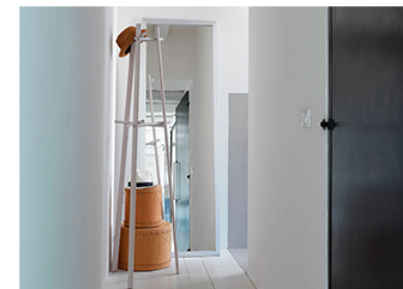

Mocha  
Beech

### MATERIALS

- Wood

The interlocking theme is the characteristic of HCB, an elegant coat hanger in solid beech. The overall design, essential and linear, is composed of pairs of orthogonal elements: three uprights and as many shorter cylinders, arranged in an almost horizontal position, precisely.

Coat stand made of solid water-stained beech elements.
