2006

### FINISHES

External Finish - Matte Polyethylene

White

External Finish - Glossy Polyethylene

Black

Dusty Grey

Red Wine

Beige Grey

### MATERIALS

- Polyethylene

Its name means 'trash', but Korzina is very useful to hide all those useless and intrusive objects that occupy our space. In the white variant Korzina is made of mass-dyed polyethylene and obtained by rotational molding. The colored variants are painted with a glossy finish and suitable only for indoor use.

Paper bin in polyethylene, made by rotational moulding. The polyethylene is mass dyed in the matte version and is painted in the glossy version.
