MATERIALS

- Metal
- Leather

Network is part of a project aimed at creating a new and multi-functional bookcase. A lightweight bookcase – with a slim and modular structure – equipped with mobile thermoformed panels in faux leather which can change configuration in line with the metallic structure of the bookcase, thus allowing a total customizing of the composition.

Painted metal bookcase. Removable thermoformed shelves in eco-leather, equipped with magnet for locking on the structure of the bookcase. Two or more modules can be combined & joined by means of a clip supplied in the assembly kit. Adjustable feet.
