## Zontik Umbrella Stand

2006

### FINISHES

External Finish - Matte Polyethylene

White

External Finish - Glossy Polyethylene

Black

Dusty Grey

Red Wine

Beige Grey

### MATERIALS

- Polyethylene

The Zontik umbrella stand keeps things well organized. Zontik diligently collects and contains any water that may drip from wet umbrellas. Zontik is made of mass-dyed polyethylene and obtained by rotational moulding. The coloured variants are painted with a glossy finish and are only suitable for indoor use.

Umbrella stand in polyethylene, made by rotational moulding. The polyethylene is mass dyed in the matt version and is painted in the glossy version.
