## Opus Incertum Bookcase

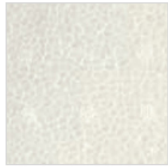

2005

### FINISHES

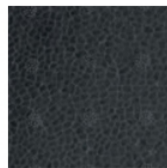

Structure Finish - Expanded Polypropylene

Dusty Grey

White

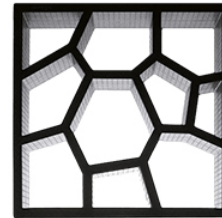

Black

### MATERIALS

- Expanded Polypropylene

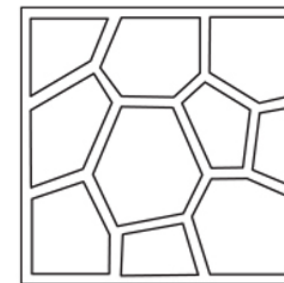

The Opera Incerta (Opus Incertum) is an ancient Roman building technique that involves the way in which the face of a wall is made of concrete work. Sean Yoo was inspired by history to design a versatile and lightweight Opus Incertum, made of expanded polypropylene, which performs the functions of display unit, bookcase, storage unit, partition wall, and much more.

Bookcase or display shelf unit in expanded polypropylene.
