## Riddled Rectangular Dining Table

2007

### FINISHES

Top Finish - Glass

12mm Tempered Glass

Leg Finish - Wood

Origami Wood in Walnut

### MATERIALS

- Glass
- Wood
- LED Light

Tempered glass top, 12 mm thick. Legs made from a wooden material designed and patented by Horm, which can be folded up like origami. Optional LED system (input 100-240V -Europlug CEE 7 /16) with rechargeable batteries (6 hour battery life) on the inside of the legs.

The thin sheets of wood, folded through laser engraving, make this project even more spectacular in its apparent defiance of the laws of physics.
