Donald - Square and rectangular high tables in laminated 5+5 mm extralight glass. The base is made from a thick mirror-polished stainless steel plate, topped by a volume in colored transparent glass, bonded at 45°. It is possible to choose either a version with degrading shade downwards or upwards. A version is available with either grey or orange degrading shades, or with a multi-chromatic effect, with the sides of the parallelepipeds in different colors (yellow, orange, pink, red, green), which mix when overlapped with the transparency of the glass. The top, laid on the base, refined interlocking system between mirror-polished stainless steel elements fixed to the glass.
