**Mandarin** - Series of glass chest of drawers with structure in transparent colored laminated glass, UV- bonded with base and drawers in naturally darkened solid ash created with a heat treatment. Extralight glass strips, glued to the sides of the furniture, act as "invisible" runners for the drawers - left completely visible - thanks to lowered grooves on the sides. The results are objects with a refined technical solution, a high aesthetic and formal value. Available in monochromatic glass or a version with the back in a different color. Under the base there are wheels allowing easy movement.
