### MATERIALS

- Glass
- Wood

**Sublimazione** - High table in laminated and glued glass. Through a special printing process, the walnut essence is reproduced by transparency onto the glass, so that a refined and experimental fusion between two such different materials is obtained. The wood, supported and absorbed in the extralight glass, transcends its inherent material source becoming a sublimation and ethereal emblem. Available in the finishes clear or dark walnut, and in transparent extralight glass (with tempered top).
