Dioniso Bed

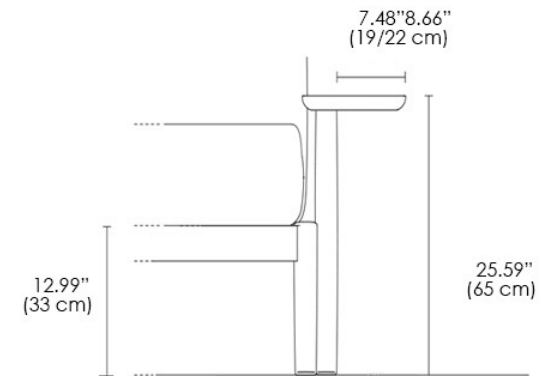

Handicraft workmanship applied to solid wood is paired with sturdy, tapered lines for a soft-touch design. The headboard boasts large, feather-filled cushions that create a soft headrest to relax on. A metal frame with wooden slats whose structure sits flush with the top of the bed frame. The rear feet support the headboard and, in the version with trays, become square-shaped swivel trays, installed on the sides of the headboard. Headboard cushions are padded with down feathers. The upholstery is made of a non-removable fabric, leather and synthetic leather.
