

Onboard weighing Kit

- 4* MT412 load cells
- 1* St steel Junction Box
- 1* MI104 Indicator
- 5m long cable

This kit includes everything to make your own on board truck / wagon weighing scale . This kit is available in two versions with 4 load cells of 2t or 5t capacity each. With mounting bolts (not included in the kit), you can bolt the load cells to the chassis of the truck, feeder wagon etc and attach the tray on top of the load cell.

The MI104 indicator has internal rechargeable battery to work without power (up to 16 hours) and can be charged from the vehicle's 12V battery. The MT412 load cell can also be used in various weighing applications where a rigid connection is required to keep the load in place .

Kit with more than 4 load cells can also be supplied and indicators are available in stainless steel casing.

Model	Capacity	Division	Load cells	Mounting Bolts
CLCK4000	4000kg	2kg	4*MT412, 2000kg	M12 (4 pcs)
CLSK100000	10000kg	5kg	4*MT412, 5000kg	M16 (8 pcs)
