

Example installations are shown on standard 4" centers. Installation on greater than 4" centers offers more flexibility and nearly unlimited options. The Sapphire can be installed with the main valve in any position in a full 360 degree range. The spout swivels a full 360 degrees.

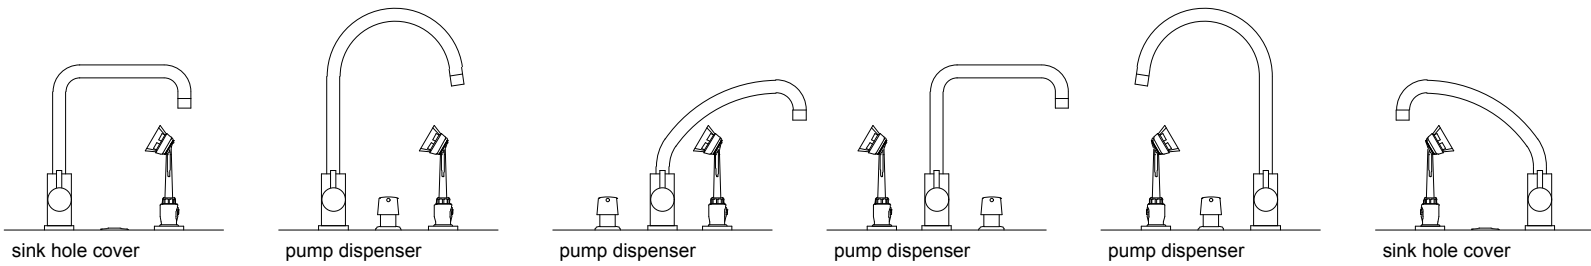

3-hole sink - main valve on left

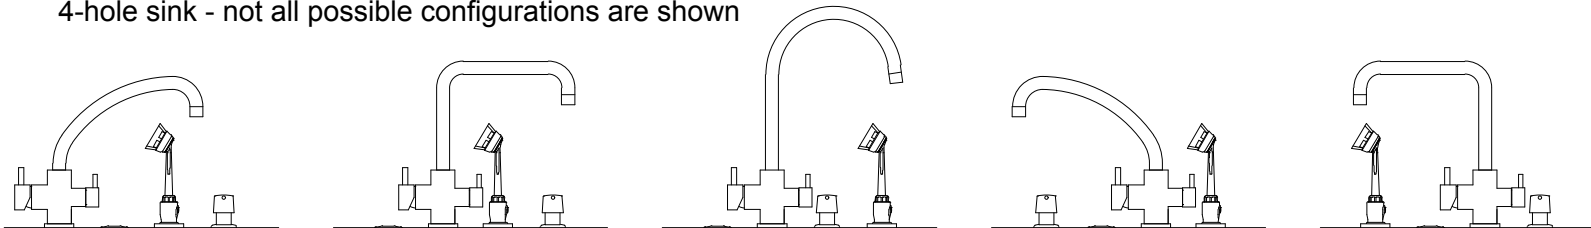

3-hole sink - main valve on right

3-hole sink - main valve in front - not all possible configurations are shown

4-hole sink - not all possible configurations are shown

Unacceptable configurations - neither the wand nor the pump dispenser should be installed next to the main valve on 4" centers unless the body is rotated to provide clearance (see: 3-hole sink - main valve in front)
