We want you to know. That’s why we provide full reporting of our test results, even those that show acceptable trace amounts of heavy metals. While it’s impossible to eliminate all traces of heavy metals, as they are naturally-occurring components of our environment, found in the water, soil, air, and fruits and vegetables, we know how important safety is for us all and make sure those levels as kept as low as possible at all times and always within the legal limit. That’s why our products either meet or fall below the limits set by California’s Prop. 65 – the strictest standard, worldwide, for environmental toxins. For more information on the presence of heavy metals in our products, [click here](#).
