

SPLICE TENT

FEATURES

- Cold Rolled Steel Hinges
- 18 Gauge Galvanized Tubing for the roof struts
- X-Frame on the back wall
- Fiberglass rod tension frame, 70% glass content
- Urethane coated polyester fabric flame retardant - CPAI-84
- ANSI Safety green sidewalls UV Treated
- Water repellent coating
- 14' Windlines on each side of the tent
- 12" Ground flaps on the sides

Splice tents for outside field applications are made of tough urethane coated polyester fabric. Fosco offers the standard splice tents and the new Space Saver splice tents. The Space Saver tents have the same sturdy design and dimensions as the standard series except the front and back walls are vertical, rather than sloped. Space Savers have approximately 25% shorter folded length for storage and can be set over a cable or pipe.

SPECIFICATIONS

9" x 34" Vent Window - In Back
10" Blower Port - In Back
