

Buffer Tube Fan-Out Kit, outdoor

12 F, 25-in legs

CORNING

Corning outdoor buffer tube fan-out kits provide the ultimate solution for the field installation of connectors for the termination of 6- and 12-fiber buffer tubes. Ideal for cross-connects, these kits provide the most compact, easy-to-install fan-out solution. The compact design requires no additional hardware or space than that required for terminating tight-buffered cables. The 900 μm fan-out assembly is color coded to match the fiber color scheme and is available in 6- or 12-fiber units in lengths of 25- or 47-in. These different lengths provide the installer the flexibility needed for a variety of hardware options.

Features and Benefits

Bend-radius design consideration

Fiber protection

Fiber routing capabilities

Better fiber management

Compensation for wide temperature fluctuation

Outdoor use
