THIS BUNDLE CONTAINS THE FOLLOWING:

AMBIGUOUS LOSS IN PATIENTS WITH TRAUMATIC BRAIN INJURY

**Instructor:** Jenna Grove, RN, BSN, CRRN, Clinical Instructor, Shirley Ryan AbilityLab

**Description:** The traumatic brain injury population often experiences some semblance of ambiguous loss. This unique experience and pathology, requires an understanding of the condition and using appropriate therapeutic approaches when interacting with these patients/families. This webinar will focus on an in-depth exploration of ambiguous loss and its history, along with techniques and therapy approaches when working with this population.

**Objectives:**
- Explain the concept of ambiguous loss and different situations in which this may occur
- State three appropriate goals for those experiencing ambiguous loss
- Discuss three appropriate approaches when working with a family experiencing ambiguous loss
- Describe the role of hope in coping with ambiguous loss

**CEUs:**

**Occupational Therapy**

The Shirley Ryan AbilityLab is an approved provider for the American Occupational Therapy Association to offer continuing education in occupational therapy. This introductory level program awards occupational therapists 0.1 CEUs or 1 contact hours. The assignment of AOTA CEUs does not imply endorsement of specific course content, products, or clinical procedures by AOTA. Category 1: Domain of OT; Category 2: OT Process

**Physical Therapy**

This course has been approved by the Illinois Physical Therapy Board for 1 Contact Hours. Approval #216-000069.

**Speech-Language Pathology**

This course is offered for 0.1 CEUs (Introductory level, Professional area)

**Disclosure**

*Financial* - Receives honoraria for teaching this course from the Shirley Ryan AbilityLab

*Non-Financial* - No relevant nonfinancial relationship exists

BEHAVIOR MANAGEMENT FOR PATIENTS WITH TRAUMATIC BRAIN INJURY

**Instructor:** Katie Burress Kestner, PT, DPT, NCS, Physical Therapist, Outpatient Allied Health Program, Shirley Ryan AbilityLab

**Description:** Following traumatic brain injury (TBI), as many as 70% of survivors will experience behavioral changes that impact their ability to interact in socially appropriate manners and participate in therapeutic
interventions that are necessary to optimize recovery. This webinar will empower the clinician with a variety of strategies to approach behavior management when it interferes with participation in therapy. Clinicians will use documentation and outcome measures to assist in objective tracking of behavior as it relates to progress in therapy. Case study application will allow the clinician to apply principles and problem solve real life case examples to improve application to clinical practice.

**Audience:** Physical Therapists, Physical Therapist Assistants, Occupational Therapists, Occupational Therapy Assistants, Speech-Language Pathologists, Nurses

**Objectives:**
- Recognize specific behaviors and clinical implications of behaviors that occur following traumatic brain injury
- Summarize clinical techniques to manage behaviors during therapeutic intervention to optimize participation
- Identify environmental modifications to reduce the incidence of behaviors
- Select outcome measures and specific documentation to track behavioral manifestations

**CEUs:**

**Nursing**
The Shirley Ryan AbilityLab is an approved provider of continuing nursing education by the Ohio Nurses Association, an accredited approver by the American Nurses Credentialing Center’s Commission on Accreditation. (OBN-001-91) (OH-362, 9/01/2017).

This CNE activity is being offered for 1.5 contact hours.

**Occupational Therapy**
The Shirley Ryan AbilityLab is an approved provider for the American Occupational Therapy Association to offer continuing education in occupational therapy. This intermediate level program awards occupational therapists 0.15 CEUs or 1.5 contact hours. The assignment of AOTA CEUs does not imply endorsement of specific course content, products, or clinical procedures by AOTA.

**Physical Therapy**
This course has been approved by the Illinois Physical Therapy Board for 1.5 Contact Hours. Approval #216-000069.

**Speech-Language Pathology**

This course is offered for .15 CEUs (intermediate level, Professional area)

**Disclosure**
- **Financial** - Receives honoraria for teaching this course from the Shirley Ryan AbilityLab
- **Non-Financial** - No relevant nonfinancial relationship exists

**RETURN TO WORK FOR PATIENTS WITH BRAIN INJURY**

**Instructors:** Jennifer Barthel, MS, CRC, Vocational Rehabilitation Counselor, Shirley Ryan AbilityLab and Danielle Williams, MS, CCC-SLP, Speech-Language Pathologist, Adult Outpatient Clinic, Shirley Ryan AbilityLab

**Description:** Return to work after a brain injury can present significant challenges. This course will focus on identifying cognitive issues impacting vocational planning; determining readiness for return to work and
strategies for implementing a plan for successfully addressing a realistic plan for return to work; and continuing speech pathology support throughout the return to work process; reassessing therapy needs post-return to work.

Objectives:

- Outline the cognitive and/or language impairments impacting vocational goals.
- Identify the “right time” and benefits of returning to work.
- Recognize the factors that impact on success of returning to work.
- Summarize how to determine realistic return to work goals.
- Discuss how to address compensatory strategies and accommodations for a successful return to work plan.

CEUs:

**Physical Therapy**
This course has been approved by the Illinois Physical Therapy Board for 1.5 Contact Hour. Approval #216-000069.

The Shirley Ryan AbilityLab is recognized by the New York State Education Department's State Board for Physical Therapy as an approved provider of physical therapy and physical therapist assistant continuing education. This course has been approved for 1.5 contact hour.

**Occupational Therapy**

The Shirley Ryan AbilityLab is an approved provider for the American Occupational Therapy Association to offer continuing education in occupational therapy. This intermediate level program awards occupational therapists 0.15 CEUs or 1.5 contact hour. The assignment of AOTA CEUs does not imply endorsement of specific course content, products, or clinical procedures by AOTA. AOTA Classification Code: Category 2: OT Process

**Speech-Language Pathology**

This course is offered for 0.15 ASHA CEUs (Intermediate level, Professional area).

Non-Financial - The instructors have no relevant nonfinancial relationships to disclose

MEDICAL COMPLICATIONS OF PATIENTS WITH TBI AND ITS IMPACT ON REHABILITATION

Instructor: David Ripley, MD, Medical Director, Brain Injury Medicine and Rehabilitation Program, Shirley Ryan AbilityLab; Associate Professor, Department of Physical Medicine and Rehabilitation, Northwestern University Feinberg School of Medicine
Description: This course will review common medical complications associated with traumatic brain injury by organ system, discussing frequencies, recognition, and management approaches. The review also will summarize the existing literature on the impact of these conditions on rehabilitation and long-term outcomes.

Objectives:

- Discuss the common medical complications after TBI
- Describe when acute referral to a specialist is needed
- Explain how medical complications may interfere with the course of recovery
- Summarize some of the common medical and modality interventions
- Describe the impact of complications on TBI prognosis
