CHILD SAFETY SHUTTER

Designed with safety shutter on each outlet, the Targus surge protector prevents children from accessing the live terminals.

SPACED OUTLETS

Outlets are designed to accommodate electrical adapters and/or oversized plugs, thanks to the wide space around each outlet.

NON-FLAMMABLE CASE

The high-impact non-flammable plastic housing provides additional protection, for a safer usage.

HEAVY DUTY 2-METER (6.6 feet) POWER CORD

A generous 2 meter (6.6 feet) long heavy power cord allows for convenience and flexibility, away from the wall.

GROUNDING OUTLETS

Expand from 1 single grounded outlet to 4 grounded outlets, by simply plugging into the wall. The Targus surge protector prevents appliances from surges caused between hot, neutral and ground lines.

USB SMART DETECTION

Automatically detects the exact charge required by the connected devices and delivers maximum charging speed accordingly
