

## PRECISION® + + + + 1/2

### Description

**PRECISION® Nitrile Powder Free Exam Gloves** are formulated to offer extra softness and superior stretch to maximize comfort and minimize hand fatigue. The surface is textured for improved grip during both wet and dry procedures. They are packaged in 100-count boxes and available in a violet color in sizes XS, S, M, L, and XL. **PRECISION® Nitrile Powder Free Exam Gloves** were evaluated by 43 consultants in 1662 uses. These nitrile gloves received a 91% clinical rating.

### Product Features

Consultants liked the deep violet color of **PRECISION® Nitrile Powder Free Exam Gloves**. These gloves felt stretchy and more elastic than other nitrile gloves, providing a comfortable fit. The elasticity made them easy to don, and they were resistant to tearing. The 100-count boxes evaluated were packed such that individual gloves could be dispensed easily. 54% of consultants rated **PRECISION® Nitrile Powder Free Exam Gloves** better than other nitrile gloves they have used and 37% rated them equivalent. 81% of consultants would switch to these gloves and 91% would recommend them.

### Consultants' Comments

*"Thin yet resistant to tearing."*

*"Good fit for non-latex gloves."*

*"Very little sagging, and when pulled on they stayed in position – no slipping off."*

*"The grip is better than other nitrile gloves."*

*"The packaging was excellent. I didn't pull out half the box trying to get just one."*

*"They had more stretch than most other nitrile gloves."*

## MIRACLE® + + + +

### Description

**MIRACLE®** is a lightweight, powder-free, nitrile exam glove. These aqua blue-colored gloves have textured fingertips and are available in sizes XS, S, M, L and XL. Two hundred gloves are stacked flat in each box for single glove dispensing. **MIRACLE®** was evaluated by 47 consultants in 2460 uses. These nitrile gloves received a 90% clinical rating.

### Product Features

**MIRACLE®** gloves are soft and flexible, enhancing user comfort. The thin 3-mil fingertips enhance tactile sensitivity. Fit of these gloves varied among individuals, but generally consultants found that those with long fingers were especially comfortable in **MIRACLE®** gloves. A number of consultants mentioned durability and tear resistance of these gloves. The packaging made dispensing easier than many other nitrile gloves. 49% of consultants rated **MIRACLE®** better than other nitrile gloves they were using and 32% rated it equivalent. 57% would switch to **MIRACLE®** and 81% would recommend the product to a colleague.

### Consultants' Comments

*"Great color."*

*"Stretch more than other nitrile gloves."*

*"Finally...a glove with fingers that are long enough!"*

*"Soft feel and good tactile sense."*

*"Gloves were not packed overly tight in the box—easy to dispense."*
