PRODUCT CATALOGUE

# EASY SAFETY SIGNS

Good communication is the foundation of any successful workplace health and safety initiative, and signage, as a simple, non-verbal education and warning tool, can play a critical role in any safety communication strategy.

Safety signs ensure that employees and visitors are made aware of hazards and potential dangers around them, and therefore can encourage people to take the requisite precautions necessary to prevent injuries or serious accidents. Furthermore, safety signage can also prove crucial in communicating work health and safety policies to employees that may have language difficulties or different cultural backgrounds.

There are plenty of companies out there making safety signage, and providing graphic design and printing services - but none of them are quite like Easy Safety Signs. We are a 'one-stop shop' for any and all visual, signage and graphics requirements.

## A COMPANY LIKE NO OTHER

---

Established in 2018, Easy Safety Signs is based in Perth, Western Australia. A modern operation that houses the latest machinery and technology necessary to deliver exceptional service.

### Quality

Customers can feel assured that all the products produced are designed and engineered to the highest quality, meeting all the necessary Australian classifications.

Easy SafetySigns use the latest cutting-edge technology, including UV flatbed digital printing and automated UV-cured screen printing machinery.

### Service

Should you need a little extra help, our dedicated customer service team have the technical knowledge and experience to assist in

recommending the right signage to suit your requirements.

### Fast Production

We understand the importance of delivering in a fast, timely service; we keep a wide range of standard safety signs in stock to assist with urgent requests, and can produce custom sign requests within 2-3 days dependent on quantities needed.

### Environmentally Conscious

At Easy SafetySigns we take our environmental responsibility seriously, and are always looking for eco-friendly products as a first option when deciding on equipment, raw materials or supplies.

- Our polypropylene is fully recyclable and is made up of 50% recycled materials, ensuring our suppliers are also reducing their carbon footprint.
- Our packaging cartons are made from recycled material and designed to allow our distributors to reuse the same packaging to forward on to their customers.
- Our raw material waste is always kept to a minimum as a result of our lean culture and we operate an in-house recycling program to recycle all mild steel, aluminium, plastic and paper.
- We use environmentally friendly products for all our printing processes.
- We source and use machinery with low power usage where possible.

## WHAT CAN EASY SAFETY SIGNS DO?

---

Easy Safety Signs prides itself on delivering tailored safety graphic solutions to customers. We produce safety signs in a range of materials as well as temporary road signage, floor stands, floor markers, pipe markers, decals, banners and posters. Basically, we can manufacture any signage to assist in keeping your job site or workplace well informed and safe.

### Bringing your idea to life

We can also design and manufacture custom signs to your specifications whilst ensuring it meets all necessary safety standards.

### Signs for every Australian

In today's multicultural Australia, it's often not enough to limit your safety considerations to English speaking employees. Our team here can design and manufacture custom multilingual signage to suit any workplace.

### Latest Technology

We manufacture all our sign products to Australian standards, using a multitude of advanced printing production methods and technologies.

Delivering a versatile and reliable service requires expertise, but also the right tools. Easy Safety Signs has invested in some of the latest graphic design and printing technology to help ensure our signs are of an exceptional quality.

For example, our automated low energy LED cured printer produces signs that dry instantly as opposed to using conventional inks that can take up to 48 hours to cure - and that's just the first coat. The benefit is a faster turn-around time without compromising on quality.

Our CNC router allows us to cut special, contoured signs. We can create signs that are uniquely shaped to suit a wide range of environments.

This is just a brief overview of the services Easy Safety Signs has to offer. Please contact us if you would like any further information or assistance with your signage requirements.

## SIGNAGE STANDARDS AND CLASSIFICATIONS

---

In Australia, there are several Standards that cover the design and correct use of safety signs in the occupational environment to warn employees of potential safety hazards, provide emergency information, and to regulate and instruct employees in the correct behaviour in a specific work environment.

---

### AS 1319:1994

Safety signs for the occupational environment

---

### AS 1742:2003

Manual of uniform traffic control devices

---

### AS 2293:2005

Emergency escape lighting and exit signs for buildings

---

Safety signs are broken down into different classifications, based on their function and use.

Refer to the appropriate Australian Standards and state regulations for more information.

### REGULATORY SAFETY SIGNS

#### Mandatory Signs

Indicate that an instruction must be carried out, and includes a symbolic shape (white image on a blue disc) and black text.

#### Prohibition Signs

Indicate that an action or activity is not permitted, and includes a symbolic shape (black image enclosed in a round red circle with a red crossed line) and black text.

#### Limitation or Restriction Signs

Place a numerical or other defined limit on an activity or use of a facility, and includes a symbolic shape (black number or other limit enclosed in a round red circle) and black text.

### HAZARD SAFETY SIGNS

#### Danger Signs

Warning of a hazard or hazardous condition that is likely to be life threatening, and includes a symbolic shape (incorporates the word DANGER in white lettering on a red oval shape) and black text.

#### Warning Signs

Warning of a hazard or hazardous condition that is not likely to be life threatening, and includes a symbolic shape (black image enclosed in a black triangle) and black text.

#### Dangerous Goods Signs

Internationally recognised to identify whether substances are flammable liquids, toxic substances, corrosive substances or other classes of dangerous goods that require special care in handling and storage.

### EMERGENCY, FIRE & NOTICE SAFETY SIGNS

#### Emergency Signs

Indicates the location of, or the directions to, emergency related facilities such as exits, safety equipment or first aid facilities, and may include a symbolic shape (white image against a green background) and white text.

#### Fire Signs

Advises the location of fire alarms and fire-fighting equipment and may include a symbolic shape (white image against a red background) and white text.

#### Notice Signs

Notice signs communicate instructions, identify restricted access or remind employees of health and safety policies within your facility or site.

## VIEWING DISTANCE GUIDE

When choosing the size of the sign required for a specific work environment, you must take into consideration available lighting in the area the sign will be located, and the viewing distance between the observer and the sign location.

AS 1319:1994 states the recommended minimum size for a symbolic sign is 15mm per metre of viewing distance. Below is a viewing distance guide designed to help you choose the correct size of a sign for a specific work environment.

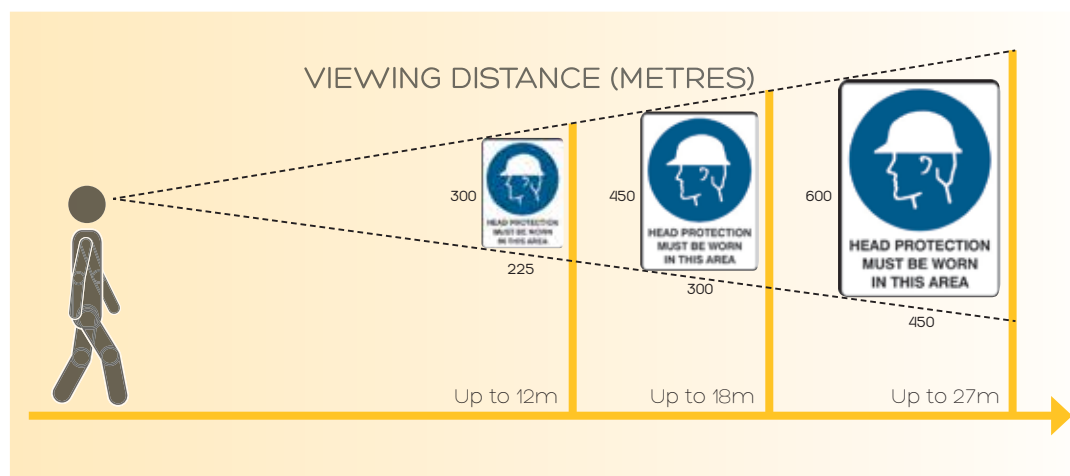

It is also important that safety signs be positioned carefully to maximise their effectiveness. Obviously, safety signs should be positioned in visible spaces, as near as possible to the hazard in question, so long as people still have time to read and interpret the sign before encountering the danger.

General safety reminders can also be placed throughout the workplace in

common space areas. All signs should be positioned at eye level and should not be placed on movable objects, such as windows or sliding doors.

Finally, employers looking to use safety signage should also ensure that the meaning and implications of these signs are taught to all new employees during induction. Ongoing workers should also receive regular reminders and refresher lessons on what the safety signs around their workplace mean.

Please Note: Signs in poor lighting conditions, not likely to fall readily into the observer's line of sight, or placed in a less conspicuous position will need to increase the legend size by 50%.

# INDUSTRIAL SIGNAGE

Mandatory Signs	10
Danger Signs	12
Hazard Signs	16
Prohibition Signs	18

# Mandatory Signs

## Mandatory

- Regulatory signs which indicate that an instruction must be carried out
- When symbols are used they are white on a blue disc
- Text only mandatory signs are black on white in a portrait format
- Sign sizes are width x height (mm)
- Complies with AS 1319:1994

# Hazard Signs

## Hazard

- Signs which warn of a hazard or hazardous condition that is not likely to be life-threatening
- The symbolic shape used on warning signs is a black triangle with yellow interior and black symbol
- Sign sizes are width x height (mm)
- Complies with AS 1319:1994. AS 1319 does not require that the word 'Warning' be printed on the sign, these signs are offered due to popular demand

# Prohibition Signs

## Prohibition

- Regulatory signs which indicate that an action or activity is not permitted
- The symbolic shape used on Prohibition signs is the red annulus and slash over a black symbol
- It is allowable for prohibition signs to contain only the red annulus and text with no symbol
- Sign sizes are width x height (mm)
- Complies with AS 1319:1994

670	Blank	White	0530 1457

## Floor Stands

- Two-sided floor stands
- High density polypropylene
- Maintenance-free; will not dent or corrode
- Large message area visible from a distance of over 9m

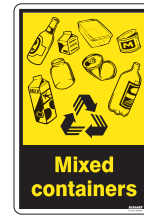

# Recycling Signs

## Recycling

- Signs which are used to provide instructions for waste separation
- Sign sizes are width x height (mm)
- A wide range of recycling signs are available in various materials and sizes. The full range is listed in the part table below

# Dangerous Goods Diamonds

## Dangerous Goods

- Internationally recognised to identify whether substances are flammable liquids, toxic substances, corrosive substances or other classes of dangerous goods that require special care in handling and storage
- The smaller size dangerous goods diamonds are sold in pack quantities:
  - 150mm (Pack qty of 5)
  - 100mm (Pack qty of 25)
  - 50mm (Pack qty of 50)
- Diamonds comply with AS 1216:2006

# Custom HazChem Sign Quotation Form

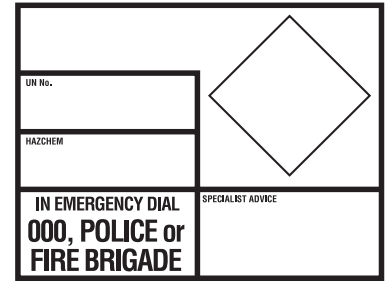

## STEP 1A: Choose the sign format & add HazChem information

TRANSPORTATION SIGN (800mm x 600mm)

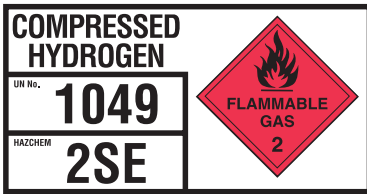

Please fill in the HazChem details

\* See 'Step 1B' for class diamond codes

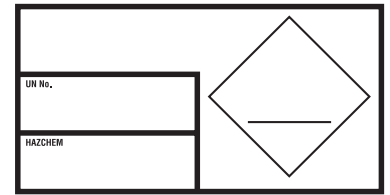

BULK STORAGE AND HANDLING SIGN (800mm x 450mm)

Please fill in the HazChem details

\* See 'Step 1B' for class diamond codes

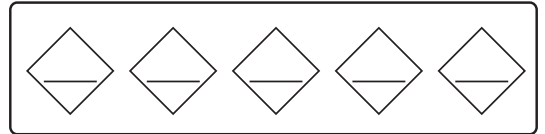

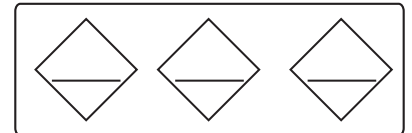

COMPOSITE HAZARD SIGN

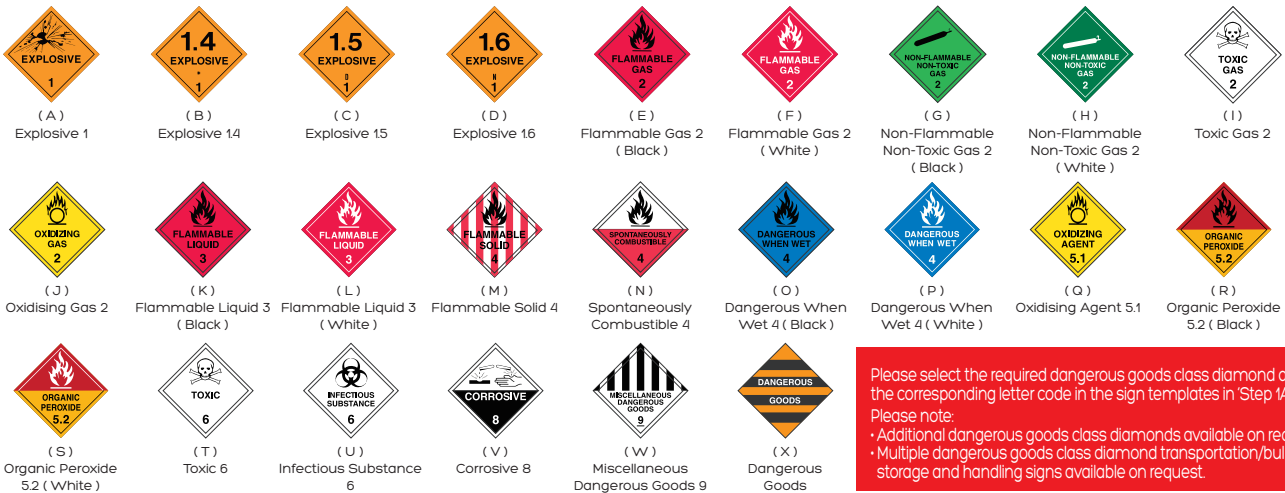

Please fill in the HazChem details

\* See 'Step 1B' for class diamond codes

## STEP 1B: Reference List - Dangerous Goods Class Diamonds

Please select the required dangerous goods class diamond and place the corresponding letter code in the sign templates in 'Step 1A' above.  
Please note:  
• Additional dangerous goods class diamonds available on request.  
• Multiple dangerous goods class diamond transportation/bulk storage and handling signs available on request.

## STEP 2: Contact details and artwork confirmation

COMPANY:

DATE:

CONTACT:

PHONE:

FAX:

I agree that the above provided information is correct and suitable to proceed to quote

PLEASE EMAIL THIS FORM TO YOUR LOCAL DISTRIBUTOR (DISTRIBUTOR DETAILS ARE ON THE BACK OF THIS CATALOGUE)

# INDUSTRY SPECIFIC SIGNAGE

Construction Signs	32
Mining Signs	34

# Construction Signs

## Construction

- Signs commonly used in the construction industry which warn of hazards, requirements on site and general instructions/information
- Sign sizes are width x height (mm)
- Complies with AS 1319:1994

Require a site specific custom sign?

Refer to our custom quotation form on page 36.

WHEN IT COMES TO SIGNAGE WE CAN  
CREATE ANYTHING IMAGINABLE.

Easy Safety Signs supplies a large range of safety signs to various industries across Australia. We create signs on an array of specialised materials to suit even the harshest environments, while ensuring we meet the strict Australian Standards. If you're after something a little different, we can also customise a sign to your specific needs.

SAFETY SIGNS | TRAFFIC & PARKING SIGNS | FLOOR STANDS | INFORMATION SIGNS  
PIPE MARKERS | HARD HAT DECALS | DANGEROUS GOODS & HAZCHEM PLACARDS  
BANNERS | CUSTOM LABELS | CUSTOM SIGNS
