

Jet-Lube® 12|34® **LUBRICANT AND PENETRANT**

Jet-Lube® 12|34® is an industrial penetrating, moisture displacing, lubricating and corrosion preventative lubricant and penetrant. It excels where saltwater, salt spray or other harsh environments are encountered. 12|34 gives total performance while being environmentally safe and easy to use.

- **LUBRICATES:** Contains ashless extreme pressure additives and highly refined lubricating oils which provide superior protection and antiwear properties.
- **PENETRATES:** Rusted and frozen metal parts - studs, nuts, screws, pins, linkages - are easily loosened by means of superior “creepability.”
- **REMOVES MOISTURE:** Moisture is lifted and displaced rather than trapped. Pores and crevices of surfaces are freed from moisture and are coated with a thin, non-greasy film that prevents additional moisture from clinging or entering.
- **PREVENTS RUST AND CORROSION:** Thin film adheres to metallic surfaces, providing positive, temporary protection against the formation of rust and corrosion, including electrolytic and galvanic corrosion common in salt environments.
- **CLEANS:** Low viscosity dissolves grease and oil for easy removal. Cleans dirt, dust and grit for easier penetration and quicker rust-busting.

Meets the Requirements of MIL-PRF-81309

JET-LUBE®

LUBRICANT AND PENETRANT

APPLICATIONS

- Maintenance, Repair and Operations (MRO)
- General Industrial
- Automotive, Motorcycles and Powersports
- Marine
- Frozen nuts and bolts
- Cables and chains
- Door locks
- Hinges
- Tools
- Firearms
- Landscaping equipment
- And much more

BENEFITS

- Non-evaporating
- Non-conductive
- Chemically stable
- Never hardens or dries out
- Economical to use
- Contains no fluorocarbons or silicones

TYPICAL CHARACTERISTICS

Appearance	Clear fluid
Color	Amber
Surface Tension, dynes/cm	24-25
Dielectric Breakdown, KV	>28
Neutral Salt Spray Protection, hours	336
Acid Salt Fog Protection	Pass
Copper Strip Corrosion (ASTM D-130)	1A
