

JET-LUBE[®]

Clean Up[™]

CLEAN-UP is a heavy-duty, low-foaming, chlorinated solvent that rapidly dissolves oil, grease, paint, tar and grime on contact, leaving a clean, residue free surface. This cleaner will not corrode or damage metal and is ideal for bearings, machinery, injectors, engine parts, tools, cables and more.

NSF has processed the application for Registration of CLEAN-UP[™] to the NSF International Registration Guidelines for Proprietary Substances and Nonfood Compounds (2009), which are available at www.nsfwhitebook.org. The NSF Nonfood Compounds Registration Program is a continuation of the USDA product approval and listing program, which is based on meeting regulatory requirements including FDA 21 CFR for appropriate use, ingredient and labeling review. This product is acceptable for use as a cleaner and degreaser for use in non food processing areas (K 1), which are used to remove oil, wax, resinous materials, or other substances not removable by using acidic or alkaline cleaning agents. Their use is limited to nonprocessing areas where there is no possibility of solvent vapors entering a processing area. Food processing equipment or utensils treated with such preparations must be washed with an acceptable detergent solution and thoroughly rinsed with potable water before returning to a processing area.

BENEFITS:

- Ozone friendly
- Non-flammable
- Residue free
- Non-staining
- Clear liquid
- Low odor
- > 29 kv Dielectric Strength
- NSF – KI

DESIGNED FOR:

A cleaner that is residue free and meets the requirements for a high rating of 29,000KV for electrical and energized equipment. A degreaser that penetrates heavy oil and grease products to breakdown and dissolve the petroleum base ingredients to clean the surface prior to painting or preparing for assembly.
