

RUN-N-SEAL® EXTREME ALL WEATHER GRADE

DESCRIPTION

JET-LUBE® RUN-N-SEAL® Extreme All Weather Grade (AWG) is a patented, METAL-FREE, high pressure sealant alternative for API-MODIFIED for OCTG 8-round and buttress connections. The compound contains graphite and other nonmetallic, inorganic, anti-wear additives blended into a state-of-the-art, all weather, rust inhibiting complex soap based grease. RUN-N-SEAL Extreme AWG contains a large volume of solids enhanced by a higher concentration of large-sized particles. The improved distribution of particle sizes and volume of solids provides an excellent seal in large and small diameter, non-shouldered threads. The complex soap grease provides a high melting point, ensures brushability over a wide range of temperatures and has excellent inherent water resistance. It sticks to we and oily steel, ensuring the compound will not wash off threads.

RUN-N-SEAL® Extreme AWG has been tested for California Code of Regulations - Title 22, Chapter 30, Article II and is not classified as a hazardous waste.

RUN-N-SEAL® Extreme AWG is nontoxic, even in a marine environment, as evidenced by test results on the California Hazardous Waste Assessment Bioassay and a "D" rating in the North Sea (OSPAR) Guidelines.

- Enhanced rust inhibiting properties
- Friction factor of 0.9 (relative to API-MODIFIED)
- Contains additives for protection against rust, corrosion and oxidation
- Prevents leakage (seals to 10,000 psi)
- High film strength to protect against wear, galling and seizure
- Exceeds all of the performance criteria described in API spec. 5CT
- Tested in conformance with API RP 5A3

APPLICATIONS

RUN-N-SEAL® Extreme AWG is recommended for use on OCTG connections,API connections and subsurface production tools. RUN-N-SEAL ExtremeAWG will lubricate, seal, and protect threaded connections of oilfield tubular goods onmakeup, in service and in storage. For premium thread designs use JET-LUBE® SEAL GUARD™.

PRODUCT CHARACTERISTICS

Thickener Complex Soap Fluid Type Petroleum Dropping Point (ASTMD-2265) >450°F (232°C) typ. SpecificGravity 1.25 Density (lbs./gal.) 10.4 Oil Separation <3.0 typ. Wt. % Loss@212°F (100°C) Flash Point (ASTM D-92) >350°F (177°C) **NLGIGrade** Penetration@25°C 310 - 330 (ASTMD-217) Copper StripCorrosion 1A (ASTMD-4048) 4-BallWeld Point, kgf 800 (ASTMD2596) 0.9 Friction Factor (Relative to API-MODIFIED) Shelf Life 5 years Brushable to -40° F (-40° C)
