PREPARATION AND DISSASSEMBLY:

PREPARATION:

Support motorcycle on a proper lift or jack. Take extra precautions to make sure motorcycle stays stable and stationary. For your safety place motorcycle in 1st gear.

DISSASSEMBLY:

1. **FOR YOUR SAFETY, DISCONNECT BOTH BATTERY CABLES (FAILURE TO DUE SO COULD RESULT IN PERSONAL INJURY).**

2. Remove your transmission and oil drain plug, drain fluids and dispose of at your local recycler.

3. Remove your rear wheel following the Factory Service Manual using proper safety precautions and tools.

4. Some models and or aftermarket exhaust systems might have to be removed in order to remove rear wheel/pivot shaft bolt.

5. With the rear of the motorcycle in the air; rear wheel removed, place a block of wood or two under the motorcycle frame toward the rear (a couple of 4x4’s will work well) this will enable you to lower and remove the jack while keeping the motorcycle raised in the rear.

6. Place the jack under the motor area with a small block of wood (small enough so it just contacts the bottom of the motor not the frame).

7. Remove your swing arm pivot shaft ¾ of the way or enough to clear the transmission tail section following your Factory Service Manual.

8. Raise the jack under the motor until the tail shaft of the transmission is about an inch above its original location. This will give you the necessary room for removal and installation of the oil pan.

**TAKE PRECAUTION WHEN RAISING THE MOTOR AND TRANSMISSION TAIL SECTION THAT YOU DO NOT BIND OR KINK ANY CONNECTORS OR MOTOR MOUNT LINKAGE.**

9. Remove the factory oil pan following the Factory Service Manual.

**FAILURE TO TAKE PRECAUTIONS WHEN LOWERING THE MOTORCYCLE, MOVING JACKS COULD RESULT IN GREAT PERSONAL INJURY. MAKE SURE MOTORCYCLE REMAINS STABLE WHEN PREFORMING TASKS.**
BAKER + ONE OIL PAN PREP:

1. Separate the oil pan by removing the 4 ¼"-20 x 1 ¼" SHCS (one in each corner).
2. Place the bottom pan and middle gasket aside for now.
3. Check for any debris inside the oil pans from shipping, THE OIL PANS MUST BE CLEAN OF ALL DEBRIS TO AVOID ENGINE DAMAGE.
4. Clean gasket surface area on transmission with brake cleaner or suitable cleaning solvent using a putty knife.

INSTALLATION:

1. Install the top piece of the oil pan with top gasket supplied in kit (p/n 26077-99A). (See Figure 2)
2. Install the 12 ¼"-20 x 1" SHCS (see figure 1) using Blue Thread Lock.
3. Make sure gasket is aligned with pan before tightening, snug all bolts evenly. Torque all bolts to 110 in lbs. following figure 3.
4. Apply a small amount of grease to the bottom pan gasket in each corner. (this will help hold it in place and aid in installation of the bottom pan)
5. Place the BAKER supplied gasket on top of the bottom pan, lining up all holes.
6. Install the bottom pan by sliding it under the top pan and then lining up the dowels, pushing into position until fully seated. (Figure 4)

IT IS CRITICAL THAT CARE IS TAKEN WHEN INSTALLING THE BOTTOM PAN SO THAT THE GASKET DOES NOT GET DAMAGED OR TORN.
INSTALLATION:

8. Install the bolts with Blue Thread Lock referring to figure 1, making sure gasket stays lined up, snug bolts.

9. Torque to 110 in lbs. following figure 5.

10. Reinstall the swing arm pivot bolt following the Factory Service Manual.

11. Reinstall the rear wheel following the Factory Service Manual.

13. Fill oil pan with 4 ½ quarts of 20W50 H-D oil or customer preferred oil. Check oil level and add as required.
Once the maiden voyage had been made around the block or down the road. Take the time to double check all fasteners for tightness. Also with the bike as close to level as you can safely get it, and the transmission fluid / oil warmed up, double check the level of the fluids. Top-off if necessary.

LIMITED WARRANTY

BAKER™ Inc. transmission assemblies, transmission kits, primaries, belt drives and wide tire kits are guaranteed to the original purchaser to be free of manufacturing defects in materials and workmanship for a period of 5 years from the date of purchase or up to 60,000 miles - whichever is sooner.

If the product is found by BAKER™ to be defective, such products will, at the option of BAKER™, be replaced or repaired at cost to BAKER™.

In the event warranty service is required, the original purchaser must call or write BAKER™ immediately with the problem.

If it is deemed necessary for BAKER™ to make an evaluation to determine whether the transmission assembly or transmission kit is defective, the entire transmission assembly, whether originally purchased as an assembly or kit, must be properly packaged and returned prepaid to BAKER™ with a copy of the original invoice of purchase.

If after an evaluation has been made by BAKER™ and a defect in materials and/or workmanship is found, BAKER™ will, at BAKER's option, repair or replace the defective part of the assembly.

Warranty card must be returned within 45 days of purchase to be valid.

ADDITIONAL WARRANTY PROVISIONS

This limited warranty does not cover labor or other costs or expenses incidental to the repair and or replacement of BAKER™ products. This warranty does not apply if one or more of the following situations is judged by BAKER™ to be relevant: improper installation, accident, modification (including but not limited to use of unauthorized parts), racing, high performance application, mishandling, misapplication, neglect (including but not limited to improper maintenance), or improper repair.

BAKER™ shall not be liable for any consequential or incidental damages arising out of or in connection with a BAKER™ transmission assembly, transmission kit, swingarm, fender, component or part. Consequential damages shall include without limitation, loss of use, income or profit, or losses sustained as the result of injury (including death) to any person or loss of or damage to property.

BAKER™ transmissions, transmission kits, primaries, belt drives, and Wide Tire Kits are designed exclusively for use in Harley-Davidson® motorcycles. BAKER™ shall have no warranty or liability obligation if a BAKER™ part is used in any other application.

If it is determined that a BAKER™ transmission assembly has been disassembled during the warranty period for any reason, this limited warranty will no longer apply.
