

Tigertail Flexible Beading Wire

Flexible beading wire, also known as Tigertail, is made of tiny wires twisted together and nylon coated. The number of tiny wires or strands, determines the flexibility of the wire. The larger the number of strands, the more flexible the wire will be. 49 strand is more flexible than 19 strand, and 19 strand is more flexible than 7 strand. 49 strand wire is very supple, 19 strand is moderately supple, and 7 strand wire holds its shape better.

COLORS

Black, Brass Gold, Bright, Bronze

Satin Copper, Satin Gold, Satin Silver, Silver Plate

Wire Diameter MM	49 Strand	19 Strand	7 Strand	Recommended Uses
0.25 (.010")		√	√	Lightweight stringing and bead weaving. Seed beads, freshwater pearls, and small gemstones.
0.30 (.012")		√	√	Popular for beads with small holes, crystal beads, seed beads, and freshwater pearls.
0.33 (.013")	√			
0.38 (.015")	√	√	√	Most versatile sizes for making necklaces, bracelets, and anklets. Use with medium to heavy gemstones, crystals, seed beads, glass and metal beads.
0.46 (.018")	√	√	√	
0.51 (.020")			√	For stringing medium weight designs. Use with large or heavy gemstone beads with unevenly drilled bead holes.
0.53 (.021")	√	√	√	
0.61 (.024")	√	√	√	For stringing large or heavy beads with large holes such as gemstones, glass, or trade beads.
0.66 (.026")			√	
0.76 (.030")	√			For stringing large glass beads, medium to large crystals, chunky metal, heavy glass and stone beads.
0.91 (.036")	√
