wholesale catalog

Recomputing is a family business based in Slovakia, EU. Here you can find unique accessories, jewelry and original home decor made of real computer circuit boards and other computer parts. These make remarkable gifts for techie lovers and geeky ones.

We are Jaroslav and Nataalka, a husband and wife team working side by side to give old computer parts new life and purpose. We started this project in 2011, having as a background Jaroslav's years as a computer specialist and Nataalka's passion for creativity and recycling. Each piece in our shop is designed, handcrafted and packed by two of us. Circuit boards as our main material are, at the same time, hard and fun to work with. Each piece we make is unique and meaningful. What once was a smart piece of PC or laptop in our hands becomes a contemporary piece of jewelry. Either it's a funny ring or earrings for a geeky girl or modern cufflinks for a Groom, it will underline one's personality and will be the most remembered gift ever. Recycling, protecting the environment is a very important part of our lives. We believe that supporting small business and conscious consumerism is going to make our planet a better place to live. We'd be happy if you support us by buying our products.
