

OontZ

Mounting Strap

for OontZ Bluetooth Speakers

User Guide

1 Place your OontZ speaker (sold separately) on the object to which you are strapping. While holding the speaker in place, wrap the strap around the object and the speaker, with the buckles over the rear side of the speaker (opposite the front grille).

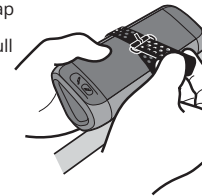

2 Insert the logo end of the strap through the first buckle, then pull back to tighten the strap.

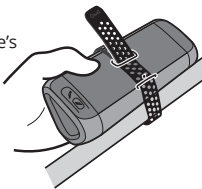

3 Insert the first buckle's prong into a strap hole to begin securing the strap, then insert the strap through the second buckle.

4 With the strap through the second buckle, pull back and tighten the strap again.

5 Insert the second buckle's prong into a strap hole to finish securing the strap.

Use with OontZ speaker only. The Mounting Strap is not for use by children under 6 years of age. Small parts can present a choking hazard.
