

Chondroprotec®

Polysulfated Glycosaminoglycan
Sterile Solution

Directions for Use

1. Irrigate wound with normal saline solution.
 2. Either pour contents of vial or dispense from syringe to withdraw solution and cover wound site.
 3. Cover with a non-adherent dressing.
- Note: Subsequent applications of Chondroprotec® can be injected through the dressing as to not disturb the wound bed.
4. Reapply Chondroprotec® daily and redress wound site every 5-7 days or as needed.

Caution

Not for food animal use.

No known side effects. Not intended for use as a long term or permanent dressing.

Storage

Store at controlled room temperature (15-30°C or 59-86°F).

Protect from freezing.

Sterile when unopened.

Discard unused portion.
