

# EyeBag® *Omega*

**for Dry Eye and MGD**

**Easy to swallow  
softgel capsules**

EyeBag® Omega contains essential fatty acids, antioxidants, vitamins and minerals which benefit the tear film and improve eye comfort

**Blister packed to protect active ingredients and ensure freshness**

## **EyeBag® Omega - How does it work?**

EyeBag® Omega has a dual action.

Omega fatty acids are anti-inflammatory. Inflammation is an important feature of dry eye. It is both a cause and a consequence of dry eye disease.

The antioxidants in EyeBag® Omega both protect the ocular surface from oxidative stress and increase density of cells which produce mucin, a crucial element of the normal tear film.

## **Manufacturing Quality**

EyeBag® Omega is manufactured in France by Lagad Vision Laboratories.

### **Microencapsulated zinc:**

Microencapsulation prevents fish oil oxidation so avoiding “fishy burps”.

### **Fish Gelatine:**

EyeBag® Omega softgels are exclusively coated with fish gelatine.

## **Easy to Swallow - Easy to Digest:**

EyeBag® Omega softgels are particularly easy to swallow because of their design and the fish gelatine softness. High quality fish oil and the antioxidant technology used to protect the marine Omega 3 from oxidation give EyeBag® Omega softgels the following properties:

- Odourless softgels.
- Preserved active ingredients.
- Good polyunsaturated fatty acids are not converted into “bad” trans fatty acids.

## **Choice of ingredients & sustainable development:**

All EyeBag® Omega softgel ingredients are carefully selected.

## **Our quality labels:**

**Epax®:** The EyeBag® Omega Fish oil is manufactured by EPAX AS, a Norwegian company with a worldwide reputation for high quality.

EPAX® is vertically integrated with no need to outsource in order to provide a continuous operation ensuring quality control straight from the fishing boat to the finished Omega-3 ingredient.

**Qualitysilver®:** The Qualitysilver® Technology protects and stabilises polyunsaturated fish oil against oxidation in order to preserve the oil nutritional and organoleptic qualities. Qualitysilver® Oils are 2 to 13 times more stable than non Qualitysilver® processed oils.

**Friends of the Sea®:** EyeBag® Omega products are certified by Friends of the Sea®. Only fish coming from sustainable fisheries are allowed to bear the Friends of the Sea® logo.

## **Dosage:**

Take two softgels once a day after food.

Do not exceed this recommended daily dosage without medical advice.
