

PlumePort®

Laparoscopic Smoke Filtration Device

PlumePort® is a passive laparoscopic smoke filtration device with integrated ULPA filtration coupled with activated carbon to safely filter the aerosolized contents of peritoneal smoke during laparoscopy. Containing more than two times the ULPA media as competitive passive devices, and a dual management moisture control process of a wicking agent and fluid trap, PlumePort offers essential media integrity for greater protection during longer cases.

Features & Benefits

Improves Visibility

- Safely filters surgical smoke improving surgeon's visibility, while protecting staff and patients from airborne hazards.

Adjustment Flow Control

- Lightweight design and integral control maintains peritoneal distention.

Moisture Management

- With an integrated fluid trap and wicking materials, moisture is effectively managed to ensure the integrity of the filtration media.

ULPA Filtration

- Contains more than two times ULPA filtration media than competitive devices providing enhanced protection and extending filter life.

Activated Carbon

- Incorporates activated carbon known to adsorb gases.

Universal Connectivity

- Easily connects to all standard luer lock fittings.
