

EB05.011

Protection Blanket
600D Polyester
65"x65"

The Shield protective blanket has been specifically designed for use during extractions from road traffic accidents. Used to cover the and protect the vehicle occupant during the extraction process, it features 4 powerful magnets that allow the fabric to be secured to the vehicle chassis, reducing unwanted movement. A replaceable transparent window in the blanket can be placed in front of the occupant's face, facilitating communication during extraction. Its light, waterproof material also makes an excellent item to have packed for responding to emergencies. Fluorescent yellow and reflective, it is impossible to miss, even in poor lighting conditions!

EB02.050 Red

E-Vest, L/XL Size
Mesh, 1000D Polyester,
21.25"x23.23"x1.4"

The Elite E-VEST'S is the ultimate in comfort and flexibility when it comes to carrying medical essentials. Its color and high visual banding ensure the wearer remains visible, even in poor lighting and identifies them as emergency personnel.

Universal PAL webbing provides a highly adaptive mounting, or MOLLE system, allowing packs, pouches, or other external items to be secured to the vest. Two zipped front pockets provide excellent, easy access storage for critical medical or tactical provisions.

Built strong and featuring a highly breathable mesh inner lining, the vest is both durable and comfortable, even in demanding environments. The built-in pocket for hydration bag provides the user with an important water source, vital when in the field for extended periods.

*Hydration bag not included.
