

AEDs save lives. But only if they're ready.

Sudden cardiac arrest (SCA) can happen to anyone – anywhere. That's why public access defibrillators are so important. They put lifesaving technology where it can do the most good. Unfortunately, ongoing system maintenance has been time consuming and difficult—until now.

With LIFELINKcentral AED Program Manager, managing your AEDs has never been easier. Not only will you know for certain that your AEDs are ready when you need them, you'll also save time and money on your AED program management via our streamlined web portal which offers improved functionality and ease of use.

LIFELINKcentral AED Program Manager provides clear, comprehensive information about your AED program.

Comprehensive reporting.

LIFELINKcentral AED Program Manager is designed to help you build and manage an effective AED program that can help save lives.

LIFELINKcentral AED Program Manager offers:

- Simplified implementation of AED deployments
- Improved dashboard reporting for quick program status
- Map view with visual readiness status to drive maintenance checks
- Advanced notification of battery or electrode expiration dates
- Improved tracking of non-Physio-Control devices and other equipment

Complete management system.

You can manage all your AEDs with LIFELINKcentral AED Program Manager, even non-Physio-Control devices. Just enter device information, then update inspection data on a regular schedule. You'll have complete documentation of your readiness.

LIFELINKcentral™ AED Program Manager

A plan for every AED program.

LIFELINKcentral AED Program Manager, a critical component of the Physio-Control Heart Safe SolutionSM program management service, offers substantial benefits to organizations wishing to manage their AED programs. Heart Safe Solution provides AED implementation and management programs backed by proactive customer service.
