

ACDC Interactive Guitar INSTALLATION

DANGER ELECTRICAL SHOCK

Pinball machines have high voltages which can cause DANGER TO LIFE AND LIMB. TURN POWER OFF and UNPLUG PINBALL MACHINE prior to installation. Pinball machines are high voltage and can cause electrical shock.

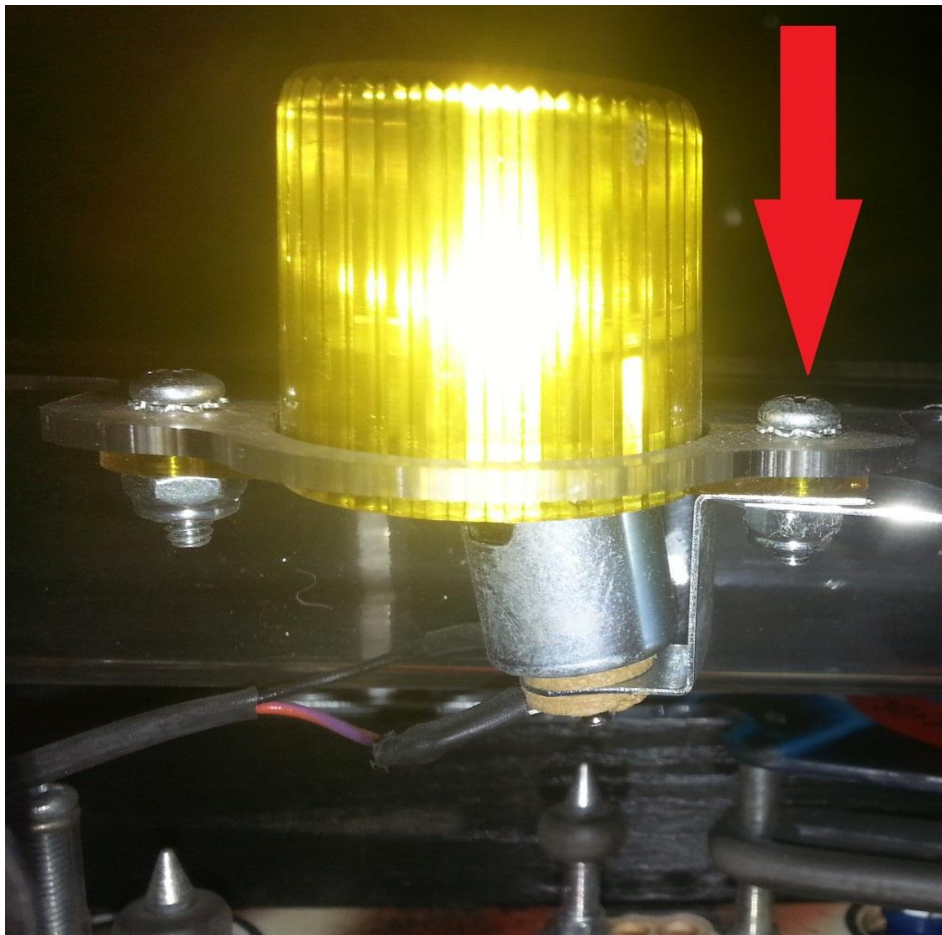

1. Remove the glass and pull the playfield into resting position
2. Take out the 3 ramp screws shown below, this will allow the ramp to loosen just enough in order to get to the plastic below.

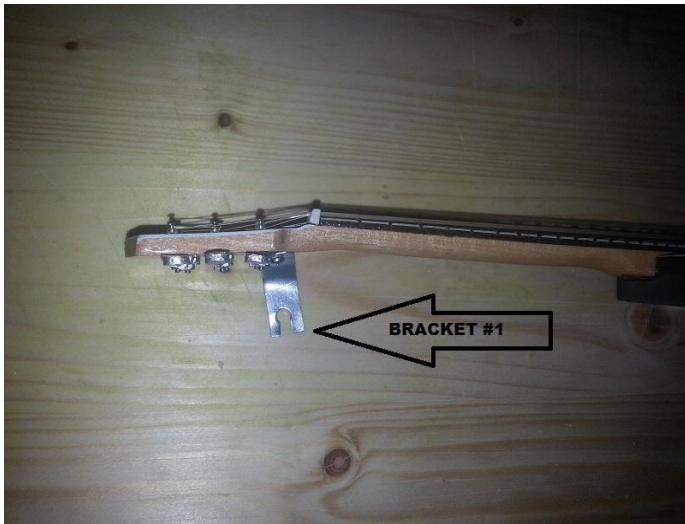

3. Take some screws off the plastic in order to loosen it just enough to be able to get needlenose pliers under it

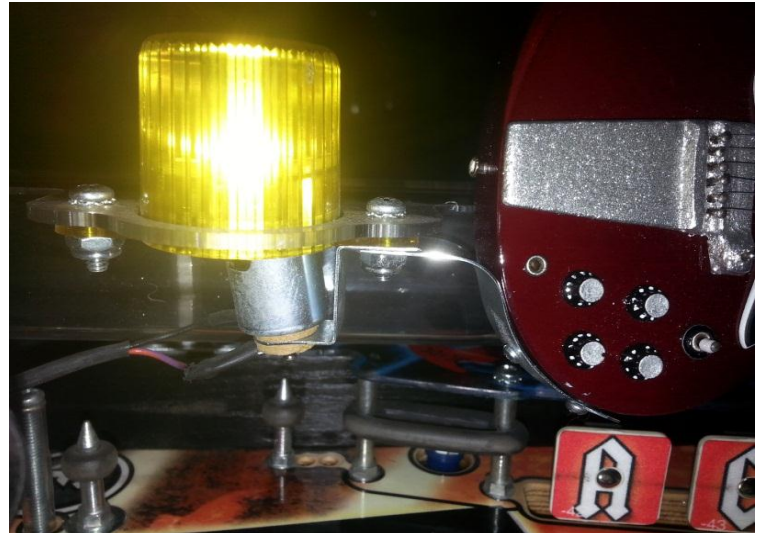

4. Take out the screw on one side of the flasher dome cover

5. Slide the guitar bracket # 1 under the screw on top of the post shown in step 3

6. Place the guitar bracket # 2 under the flasher dome cover

7. If your mod is game interactive, remove the balls, lift the playfield, hook up the alligator clips at the end of the enclosed LED strip to a near by flasher, pull the strip through any desired target opening and attach it to the back of the guitar with the provided 3M tape.

8. Check for clearances prior to the game play.
