

BLACKWATER X SWEDISH SEA RESCUE LIMITED EDITION

3 years after the launch of the popular First Series, which became Sweden's most successful watch project ever through Kickstarter, Tusenö is now launching their second model - Blackwater.

A limited edition of only 300 pieces will be produced for the Swedish Sea Rescue Society, where part of the profit will contribute to SSRS's continuing important work on Swedish sea and lakes.

SWEDISH DESIGN, SWISS QUALITY

More than 2 years of work has resulted in the first automatic timepiece from Tusenö. Together with one of the most well renowned Swiss watch manufacturers, a massive amount of work has gone in to ensure ultimate quality and a watch that will cope with even the most demanding of rescue operations.

Blackwater follows the same design philosophy as always within Tusenö, timelessness. This time, combined with uncompromising usability, to create the ultimate watch for challenging nautical life.
