SL4 SIGHT INSTRUCTIONS

THE SL-4 IS A LIGHTWEIGHT, COMPACT 4-PIN SIGHT THAT CAN BE USED FOR HUNTING OR TARGET SHOOTING

MOUNTING YOUR SITE

The SL4 comes with CBE's exclusive Smart Mount™ System, which offers 3 sets of mounting holes to allow your sight to mount at optimal elevation. In addition, the vertical adjustable dovetail track (Fig. A), your SL4 adjusts to a wide range of positions to fit any archer. Mount your sight to your bow with the two 10-24 X 3/4" screws provided. (Fig. B)

DOVETAIL TRACK ADJUSTMENT

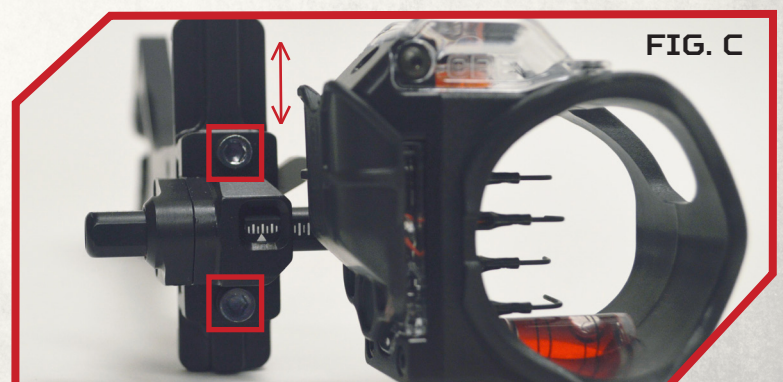

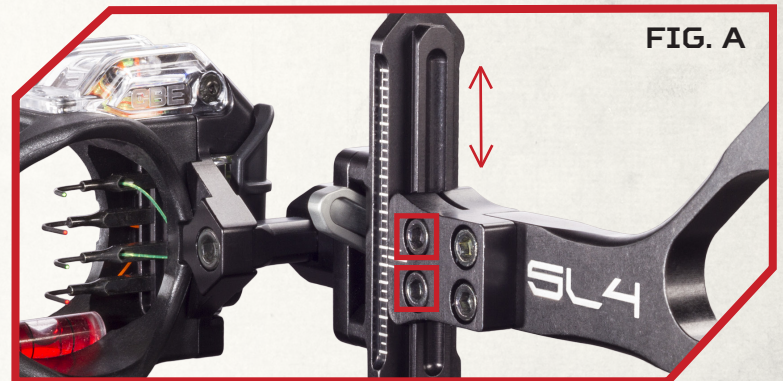

To adjust the elevation on the dovetail track, slightly loosen the two #8-32 socket head cap screws on the connector just behind the dovetail slide. Adjust the sight hood assembly to the desired height and re-tighten the screws, using care not to over-tighten the screws, which may strip the threads.

WINDAGE ADJUSTMENTS

To adjust windage, the micro-adjust lever should be pushed down to loosen the fit, the sight hood assembly moved left or right as desired, and the lever pushed back up to retighten. For additional windage, the connector block can be reversed by loosening the four screws on the connector block, sliding the vertical block out, moving the connector to the other side of the Smart Mount™, putting the two screws back into the connector, and tightening and putting the vertical block back in the connector and tightening its two screws (Fig. C).

2ND AXIS LEVELING

To adjust the 2nd axis leveling of your SL4, loosen the two #8-32 socket head cap screws on the front of the micro-adjust windage unit, adjust unit, and retighten.
