Filter Hard Case | Defender Filter Cover

Grip

Grip [S20U-GRP]

Case

Case [S20U-CSE]

Installation **Process**

Step 1

Make sure case is installed on phone.

Step 2 - Grip Installation

Attach Grip by sliding the switch upwards and pressing down to release locking ends of the grip.

Step 3

Place locking ends on one of the four predetermined rail system grooves located on the side of the case and release the Grip switch.

Installation **Process** (Continued)

Step 4

Ensure locking ends of the grip are secure by squeezing the edges. Make sure the Grip is level and tight against the case and double-check that the red indicator isn't showing on the grip switch.

- *To remove, repeat Step 2 and detach.*

Step 5 - Filter Installation

For easier installation we recommend keeping the Defender Slim™ on your filters.

Step 6

Begin by aligning the 2 tabs with the slots on the back of the LiteChaser Case.

- *If installing a VND make sure you have the arrow facing away from the case and the numbers visible.*

Installation **Process** (Continued)

Step 7

While holding the entire filter, press the tabs into the slots and slide the filter to the right until clicking into place.

- *Holding the entire filter is especially important for the VND and CP since the gold bezel spins independently of the base.*

Step 8

Your LightChaser Pro is now ready to shoot.

Still unsure about your LightChaser installation, check out the getting started video located on our YouTube Channel or FAQ page.
