

# QUARTZLINE

*CP and ND/PL Filters*

---

# What's Included

## CP and ND/PL FILTERS

*Filter | Magnetic Case | Microfiber*

---

### ***Installation***

Thread filter onto the front of your lens. Do not force it past the point of resistance. Please note the filters may be incompatible with some lens hoods.

### ***Operation***

Once installed, the bronze outer frame rotates allowing you to control the polarization angle of the filter.

### ***Setting Polarization Alignment***

The polarization alignment can be set by looking through the viewfinder/monitor while rotating the filter. The ideal alignment is generally seen when any glare is cut down off of reflective surfaces. This position will be different for each new shot.

### ***Removal***

Remove the filter by unthreading counter-clockwise. Do not squeeze/pinch when unthreading, provide even pressure around the circumference of the filter as you remove it.

### ***Storage***

Place the filter back in the Magnetic Case.

---
