USER GUIDE

EREADA®
CLASSIC AMETHYST MATS
3. Bag for storage and carrying the mat
2. High absorption breathable waterproof multilayer protection
1. Ereada® Brown Amethyst Mat

THE MAT SET INCLUDES:

11  DISCLAIMER
5  COVERS
3  CONTROLLERS

11 COVERS
3 CONTROLLERS

1. Cloth cover to cushion your mat and keep it clean

Professional and Single Size mats

All products, controllers, specifications and data as well as a set of items packaged in a box are subject to change without notice to improve reliability, function or design of the devices.

ADDITIONAL INFORMATION

For Compact Pro (Midsize), for Queen
For Mini mats

Energy Mat. We truly wish you to get rid of stress and enjoy a better quality of life with the aid of this amazing product.

We believe you will be very pleased with your Ereada® Far Infrared Energy Mat. We truly wish you to get rid of stress and enjoy a better quality of life with the aid of this amazing product.

We hope you experience as many positive results as we have now that you own one yourself.

When you receive your mat, please take a moment to verify that it was not damaged in transit. Carefully unpack the box and check if everything is included and in due condition. If you discover that anything was not included in the set, or there is any other reason that you wouldn’t rate this as a 5-star experience, please, contact us right away at Ereada@Ereada.com, so that we can resolve the issue as fast as possible.

In addition to hot stone functionality, deep FIR heat and negative ions generated by all our mats, Brown Ereada® Classic Amethyst mats are equipped with an advanced N.P. or E.D.N.I. function (Negative Potential generation or Electrical Discharge of Negative Ions). The function is activated by “N.P.” button with 30 minutes auto OFF on mini mats (with Q-2000NP controller only) or 60 minutes on all larger mats.

When the function is ON the controller converts electricity into save AA-battery like low amperage direct current and transfers it into a special Silver Fiber layer inside the mat creating 600 volts of Negative Potential.

This N.P. layer converts the mat into a bathtub or spa full of negatively charged ions where you can soak all cells of your body for natural refreshment after a stressful day. It is great to take a break and relax like on an ocean or waterfall beach when you feel tired and need a refreshment after a stressful day. It is great to take a break and relax like on an ocean or waterfall beach when you feel tired and need a refreshment after a stressful day. It is great to take a break and relax like on an ocean or waterfall beach when you feel tired and need a refreshment after a stressful day.

The temperatures above reflect the temperature of the inner heating elements, not the surface of the mat, which can be 10-20°F lower (or even lower than this) if the mat is not covered.

POWER ON/OFF Switch – Push to turn the mat ON/OFF.

Power ON Indicator – Lights up when the mat is ON.

Adjust Temperature Dial – Use to increase or decrease heat levels 1~7 (86°F~158°F or 30°C~70°C).

LED Temperature Display – Shows the set temperature levels 1~7.

Operation Indicator – ON when the mat is heating. OFF when it reaches the desired temperature level.

Timer Control Toggle Button – Select 3, 6 or 8 hours heating session with auto shut-off when time expires. Activate Timer first to start heating.

Timer indicators – Lights up when Timer is set to selected session length 3, 6 or 8 hours.

Negative Ion ON/OFF Toggle Button – Activates Negative Potential (N.P.) function, auto shut-off after one hour. Press the button again to stop or activate the feature.

Negative Ion ON Indicator – When N.P. is activated, OFF when it ends.

Auto Grounding EMF protection – Electro Magnetic Interception (EMI) active protection system catches harmful EMFs and removes them to the ground plug of your power outlet.

First, you should tightly connect the controller to the mat connector and only after this plug-in controller into the power outlet. Then turn ON the controller with the toggle button or power switch.

The controller has a temperature dial or a button to adjust 7 different temperature levels.

The temperatures above reflect the temperature of the inner heating elements, not the surface of the mat, which can be 10-20°F lower (or even lower than this) if the mat is not covered.

Usually, if the ambient temperature is around 70°F, it takes between 30 minutes and an hour for the mat to reach the maximum level (158°F or 70°C) if you completely cover it with a thick blanket to avoid heat dissipation.
2. Ereada® mats have a multilayer system construction with up to 20 different layers. Warmed crystals and the special layers with anion generating fibers naturally generate negative ions. Brown matts controllers do not have the option to activate negative ion generation from the inner mat layers because it starts automatically. Ereada® mat’s construction is safe and effective. But of course, any electrical appliance has its oversensitive, please be aware that some parts of all electrical appliances will get hot if you use N.P. with high temperatures.

3. All Ereada® mats come with EMF-free (less than 2 mG by specs and less than 0.2 mG by measurements), new-generation advanced heating systems on the base of Titanium twisted wires in the two layers of the base and Teflon insulation. Anyhow if you are EMF oversensitive, please be aware that some parts of all electrical devices including all brands of FIR matts may emit relatively higher EMF levels. These parts play an overheating protection bimetal switches, connection terminal, and the controller which on full power can emit up to 4-8 mG. Though these levels are safe, it is better to keep the controller at some distance from your head.

4. Due to the artisan nature of the production process, there is some difference between the matts regarding the maximum temperature they may reach in the same conditions and the heating speed. If you completely cover it with a thick blanket or lay your body on the mat, the maximum bare mat surface temperature on the 7th heating level may be around 55-65°C or 133-158°F, which is quite normal. Ereada® mat set should include, free of charge, at least one special cover, be it 2-3 thick and a thin one to protect and cushion your mat. Both covers work differently depending on the type of your session, how well you tolerate stones pressure, your body composition and experience. They are wearable and have a built-in one-way permeable heat stable and smell-free TPU waterproof membrane. It allows FIR crystals rays, Negative ions, air and moisture to evaporate from the mat keeping sweat, spills, smells, bed mites, and dust away. Both covers are SGS tested and are made only with the best quality no emission materials.

1. Thick High Absorption Multilayer Protective Pad with multiple Ereada® logos. This cover features ventilated 3-D Air Mesh supportive material for even body weight distribution and more comfort. The upper ultrasnoric quilted perforated Air Layer maintains the contact between the body and the mat surface dry. Use this protector for buffering the crystals’ pressure either while sleeping on the mat or during long sessions.

2. Thin Multilayer Waterproof Cover with 4-cornered elastic straps. This thin cover is machine washable and dryer-friendly on gentle cycle. Put it on top, if you use it together with the non-washable pad or use it on the mat directly.

6. Minimix is great for localized use, when you need to apply crystal rays and focus on some area of your body (back or legs most frequently) without causing the whole body hypersensitivity. You can use it on the head for historical application without overheating the whole body. It is portable, more bendable, and can be used on the chair or to cover the body when you are on the large mat for the more intensive "sandwich" procedure. Of course, you can use the Minimix mat itself for high heat sessions with sweating, but it may take more time. If you use high levels and your body usually sweats in the sauna or when you go to sports or workout, the Mini will work fine for this purpose as well.

7. In general, the bigger and more powerful the mat is, the more benefits it brings, and the shorter session may be necessary. Middles and larger mats are great for both the whole body experience and reenergizing sleep. Just be sure that the heat level is on the lowest, levels 1-2 of 30-45°F or use the mat either unpowered or in negative-ions-only mode at night. Do not use high heat when you go to bed. Do not rely solely on the timer. You can connect the mat through another timer plugged into the wall outlet for double safety, in order not to fall asleep on the hot mat and dehydrate. Take extra care during nighttime use, and keep the mat only on low heat settings.
CONTRAINDICATIONS*

The following may not be a full list of contraindications but if you have any of them, avoid the use of the far infrared mat in heating mode (unless you get approval from your doctor).

1. The recipients of any organ transplant should not use FIR mats. After organ transplant operations, patients usually are prescribed immunosuppressants to prevent their immunosystem from rejecting the transplanted organs. FIR sessions may increase immune system function which may be dangerous for organ transplant recipients.

2. Pacemakers and defibrillators users should not use the FIR mats in powered modes without cardiologist approval. The functions of these devices may interfere.*

3. Expeptant women should not use the heating function or FIR mat in heating mode. Excessive temperatures have a potential for fetal damage. If pregnancy is possible you should be able to sleep on this mattress or use it in the unpowered mode for ion function but be sure to consult a physician before using it for heating.*

4. Newborns and infants should not use the heat or magnetic function. Their core body temperature lies much faster than that of adults. It occurs due to a higher metabolic rate per body mass, limited circulatory adaptation to increased cardiac demands, and the inability to regulate body temperature by sweating as well as adults can. Do not use the FIR mat near babies who cannot move away or on children who cannot speak well enough to express themselves.*

5. Avoid use of the far infrared mat in heating mode completely (unless you get approval from your doctor) in the case of a recent stroke, aneurism, myocardial infarction, heart attack, unstable angina pectoris, if you take corticosteroids or have brain or other tumors.*

6. Anybody with diseases associated with a reduced ability to sweat should not use the FIR mat without the heat, in ‘negative ions only’ mode. It may be extremely dangerous to use FIR in the case of severe or persistent sweating disorders, if you can experience pain, discomfort, or other symptoms. If pain is persistent, discontinue use.*

7. Nobody with diagnosed diseases, ailments or medical conditions should ever use Ereada® mats without approval from and under guidance of your healthcare professional before and during the use of this product, which is not a medical device, nor claimed to be able to heal or cure any sickness.

1. Nobody with diagnosed diseases, ailments or medical conditions should use the FIR mat in heating mode. Anybody with diseases associated with a reduced ability to sweat should not use the FIR mat without the heat, in ‘negative ions only’ mode. It may be extremely dangerous to use FIR in the case of severe or persistent sweating disorders, if you can experience pain, discomfort, or other symptoms. If pain is persistent, discontinue use.*

2. Pacemakers and defibrillators users should not use the FIR mats in powered modes without cardiologist approval. The functions of these devices may interfere.*

4. Newborns and infants should not use the heat or magnetic function. Their core body temperature lies much faster than that of adults. It occurs due to a higher metabolic rate per body mass, limited circulatory adaptation to increased cardiac demands, and the inability to regulate body temperature by sweating as well as adults can. 7. Nobody with diagnosed diseases, ailments or medical conditions should ever use Ereada® mats without approval from and under guidance of your healthcare professional before and during the use of this product, which is not a medical device, nor claimed to be able to heal or cure any sickness.

8. Anybody taking medications or currently going under medical treatment, radiation or chemotherapy should consult a physician before using the mat in heating mode. Some medicines as diuretics, barbiturates, and beta-blockers may impair the body’s natural heat loss mechanisms. Some of the counter drugs such as antihistamines, blood thinners may also cause the body to be more sensitive to heat stroke. Steroids, nonsteroidal anti-inflammatory drugs, antidepressants, amphetamines may be the most dangerous in impairing one’s judgment. People under influence of drugs, alcohol or intoxication as patients with mental impairments or dementia should never use the mat, as they may become disoriented.*

9. Anybody experiencing a high fever should not use the mat in the heating mode. Only the negative ions function can be used until the fever stops.*

10. If you use heating creams or balms, lotions, salves or ointments that contain heat-producing ingredients, you should never use them with the mat as it may cause burns unless recommended by a healthcare professional.*

11. Anybody with fresh wounds, trauma, joint injuries or swollen joints where the cold application is necessary should not use the heating function, to improve blood circulation.*

12. Anyone with a mental or physical disability or those with limited mobility should use Ereada® mats in the negative-Ions-only mode unless under full supervision of a medical professional and have a doctor’s approval.*

13. It is not recommended to use any part of the heating area of your mat directly on your head. Your brains do not have the same efficient cooling system as the other body does. Use a pillow as a barrier between your head and the mat if you plan to sleep on it. The unique Ereada® Pillow with crystals is strongly recommended to keep your head elevated and cool.*

14. Stop using the mat if any known conditions worsen while using it. Also, do not experience pain, swelling, redness, pustules, or pain that is persistent. If the infrared heat will go to areas of disease or discomfort – some people may perceive this as pain and others as a sensation. If pain is persistent, discontinue use.*

While the above are some of the conditions which may pose dangers while using a FIR mat, it is strongly recommended to check with your healthcare professional before using a FIR mat for the first time if you have any chronic conditions or medical issues.

15. Ereada® mats intercept, and direct small EMFs into the body to regulate body temperature by sweating as well as adults can. Do not use your mat in heating modes on babies who cannot move away or on children who cannot speak well enough to express themselves.*

16. Anybody with diseases associated with a reduced ability to sweat should not use the FIR mat without the heat, in ‘negative ions only’ mode. It may be extremely dangerous to use FIR in the case of severe or persistent sweating disorders, if you can experience pain, discomfort, or other symptoms. If pain is persistent, discontinue use.*

17. While the above are some of the conditions which may pose dangers while using a FIR mat, it is strongly recommended to check with your healthcare professional before using a FIR mat for the first time if you have any chronic conditions or medical issues.

**Ereada® products are not intended to diagnose, cure, treat, mitigate or prevent any disease, illness or medical condition or to substitute for medical treatment of any kind. Information here is not to be construed as medical advice. These products and statements have not been evaluated by U.S. FDA (please, see Disclaimer in this user guide, page 11).
When you start it is important to remember to drink a lot of water in the first 20-30 minutes and degrees every other day. For you and bring a better feeling and more energy, and of course caused by hypothermia use FIR mats all the time on a slightly warm set the medium heat levels 3-4 at around 112–122°F (45-50°C). If suitable for your health and cover your body with a blanket or another protector cover under your body is must-have for everybody. It depends on the size of the mat, the temperature level, and one’s strict time/frequency/temperature protocol established by your doctor. It is important to feel comfortable and enjoy your experience, so listen to your body and adjust intensity and duration accordingly.

Extra care is necessary if you have diabetes. If a patient has a lot of sugar in the blood, it blocks the blood vessels and causes nerve disorders in some people with diabetes, which may develop nerve damage throughout the body. It is called diabetic neuropathy. If you have this condition and loss of sensitivity, you should use a strict time/temperature/frequency protocol established by your doctor, and use any heating sessions only under supervision. You should start very slowly and monitor your blood sugar.

11. If Ereada® mat is too hard for you, put the 3-0 pad, and a cover included in the set on the mat to cushion it and eliminate the crystals’ pressure. You can also add several layers of fabric or cotton to your 3-0, 3-0 Pad, and cover to make the surface even softer. As soon as your body gets used to the crystals’ pressure, you may choose to remove the extra layers one by one. Protectors and towels are great for sweat absorption during heating procedures or for cushioning.

12. Always keep your Waterproof Protector on the mat to protect it from spills and dirt. But even if your mat sometimes gets wet, do not worry, it has waterproof layers inside. Just let it completely dry before using it again, if it gets wet.

13. Be careful with your first session. Use a slow and continuous mode of increasing intensity. Begin with the lowest temperature levels 1-2 at low heat, if 3-4 at more than 1 hour per half, gradually and increase the length and intensity for several minutes and degrees every other day. Remember to drink a lot of water, and listen to your body and adjust intensity and duration accordingly.

14. It is important to keep in mind that you should not start too fast, and the cumulative effects are much more desirable without the lightness or other side effects that can come with rapid detoxification. The maximum session time is an hour for each heat level is not specified. It depends on the size of the mat, the temperature level, and one’s age, health, body size and composition, and many other factors. The main advice is to start with the lower intensity and gradually increase the intensity, length, and frequency of sessions. Of course, if you are an experienced FIR sauna owner, you can start with the maximum temperature levels in between two sessions, but we always recommend checking with your doctor first and using common sense to avoid overuse.

15. As soon as you are sure that your body reacts fine, you can use your mat as long as you feel safe. If you want to use your mat for a shorter time, you can use it from a few minutes for 30 minutes to 12 hours daily, and it should be an enjoyable process. If you want an intensive heating in sauna-like conditions, you can raise the temperature to the highest level suitable for your health and cover your body with a blanket or another mat. If you want to create a comfortable and soothing setting to relax, set the medium heat levels 3-4 at around 112–122°F (45-50°C). If you are worried about the heat level, set it around 100–110°F (37–43°C). Different people react differently and enjoy different modes. Some people with weakness by hyperthermia use FIR mats all the time on a slightly warm temperature to revive and feel well again. Other people use amethyst heating mats from one hour at the high-temperature levels to 12 hours on warm temperature. Be sure that sessions are comfortable for you and bring a better feeling and more energy, and of course, remember to get approval from a health professional.

16. If you accelerate this way, it is important to create an optimum environment to feel soothing and relaxation. To rest, you may have a short session before bedtime of about half an hour, starting at levels 2-4 (105–122°F or 40–45°C), and then decrease to the lowest levels of 1-2 (96-105°F or 35–40°C). If these levels cause any lightheaded feeling or overstimulation, set the temperature level even lower. If you feel any heat after the first session of a mat, it is normal. If you feel any heat after the first session of a mat, it is normal. But in the summer, when Amethysts can absorb some excess heat from your body and naturally return it in the form of radiant crystal rays to those parts of your body which need more warmth.

17. The second target usually is to cause sweating, which is great for detoxifying the body. Always properly hydrate and replenish electrolytes if you are planning an intensive high heat session. It is not hard to schedule such a practice as an evening duty. It may take up to an hour to preheat the mat under a thin blanket to a high heat level. Then you can lay your back on a bare mat, or a mat with a thin protector or a towel on it and cover yourself with a blanket. After the session, leave the mat for half an hour more heating to dry it out. Of course, if your body does not sweat much, you may not start to sweat right away, i.e., after several, it should come. Drink a lot of hot herbal teas (not cold drinks) before and during the sessions to accelerate sweating. When your body gets used to sweating it will be easier to sweat voluntarily.

18. For Fast Heating. If you lay down on a preheated mat or cover, you will get the maximum "detoxification" effect, as no heat is lost or dissipated. All crystal rays will travel into your body. Some advanced customers even use foil blankets: reflecting FIR rays back to the body, but they may be a very intensive practice, needing doctor’s approval only. The only exception is if each heat level is not specified. It is important to feel comfortable and enjoy your experience, so listen to your body and adjust intensity and duration accordingly.

19. Wearing clothes or using covers or sheets on the Amethyst mat hinders the conductive heat and some of the anion effects, but it should not be a problem for you to swim or relax. For the intensive practice, needing doctor’s approval, you may add another layer or add a little more warmth if you use thicker covers or pajamas.

20. If you are falling asleep while on the mat, choose the lowest levels 1-3 (30°C to 45°C or 86°–110°F) of FIR Heat before you go to sleep. Check your body temperature and get shocked. Take extra care if your child has access to the mat. It should not be too hot. It is possible to use a power outlet protected by a standard circuit breaker (not a GFCI). If one has breast implants but lies face-up, there should be an enjoyable process. Just that it should be done very slowly and carefully, and better with a doctor’s supervised detox program. Slowly and gradually increase the intensity, making sure that you do not feel too hot, and your body temperature is not higher than the best path forward, and it is important to immediately decrease intensity, duration, and frequency of sessions and contact your health care provider before using any other electrical device.

21. Getting a headache or feeling dizzy is a sign of “a healing crisis” (dehydration). It means that you are detoxing too fast. Lower the temperature, drink more water and stay on the mat for a shorter time, or even give you a rest. Slow your pace, or you may feel too lightheaded feeling. It is important to feel comfortable and enjoy your experience, so listen to your body and adjust intensity and duration accordingly.

22. Ereada® mats are designed to be used flat on your bed, massage table or sofa. You can use only the Mini mat for sitting in your chair, recliner or on the sofa. It may also work better if you need to cover or even a little wrap your body. Please, check Ereada® catalog for more details.

23. It may be a good idea to take a shower after your session. Clean yourself with a washing gel, toothpaste, K, Mg, or another detoxifying herbal tea and toxins. If you are healthy, finish with slightly warm or even cold water to close the pores. Half an hour passive rest may also be pleasant and refreshing.

24. When the controller is connected to the mat tightly and plugged into the socket, and you press the power switch, but the controller does not work. Plugged the mat into is working correctly. Plug another device into it to ensure it has power. If it is not working, check considering the electrical panel as a breaker may have popped (or broken) and needs a reset. Or try another electrical wall socket that you have verified is powering other devices. It is preferable to use electrical wall socket that is protected by a standard circuit breaker (not a GFCI). If you are using a surge protector, ensure it is working correctly. Plug another electrical device into and check that it is working.

"Detoxification" effect, as no heat is lost or dissipated.
2. Ensure the controller's plug is pushed all the way into the mat’s receptacle socket so that it is snug tight with no space at all between the controller’s plug and the mat’s connector. A loose connection is the cause of the signal exchange failure between the hot stone mat and the controller, and when too many errors accumulate the controller’s calibration may fail. The controller will show error messages, and the mattress will not heat up properly.

3. Make sure that the power button on the controller has been turned ON. The controller may show “Off” or “O” on the display. It means that the controller is OFF, or the cartridge is not in the socket, and only after this unplug the controller from the mat. If you connect the controller to the power source first, the safety program will lock it and go into safe mode. It may start to beep or flash if it’s not on time. The same may happen if there is a loss of signal interchange between the controller and the mat. To reset the controller reconnect it in the correct order.

4. Please activate the timer button and choose one of the timer settings for your heating time. Some models of the controllers do not enable the heating and other functions unless you set a timer first.

5. A frequent reason for the new controller fault and errors is an incorrect order of controller connection. Please, first connect the mat to the controller plug by holding the controller into an electrical outlet and turn the controller ON/OFF, or reconfiguring it.

6. If the controller shows errors, the easiest way to solve the problem is to reset it. Disconnect the plug from the socket first and then from the mat connection terminal. When you disconnect the controller from the socket always do it carefully with two hands holding the controller with one hand while the other hand pulls the plug. Pull the plug out of the connector on the mat carefully as well. Hold the controller plug by the cable and pull it to the mat. If you don’t, the base mat surface temperature in several minutes again, it will be much lower, about 110-130°F. If you do, you must return the controller temperature to the normal, the airflow is active, it will cool the mat down very quickly. It is normal because the hot crystals transfer radiant heat very quickly and it will cool down and then springs back to the previous status. If you pull it from the controller’s plug by the cable, it can break, or the connection may eventually become loose, and the mat will not work correctly.

7. Please, take care of your mat, and it will be your partner for a long time. Amethyst mattress is excellent for meditation, sleeping, massage and healing sessions if laying calm on it without a pad, blanket, or your body on it, the heat dissipates, and the mattress will not be hot. If you apply pressure or step on it, the stones may become loose. Try not to bend a firm mat in bent condition.

8. To fold the mat, disconnect the power plug from the socket, then from the mat. After this it is folded in a traditional way. All Ereada® Amethyst mats are rather firm. Try not to bend a firm mat in bent condition. You may leave your mat with protectors on high heat for 1 hour each week to entirely self-clean and disinfect.

All new Ereada® mats are covered by 1-year limited warranty for home use and 2-year limited warranty for professional use (starting from the date of purchase). The warranty period begins from the date of purchase. This warranty does not cover normal wear and tear, covers and accessories, user abuse, physical impacts or damage, professional or commercial use, and applies to:

- The original owner or purchaser of the product only.
- Regular personal or family use of the product in a general home, office environment.

Ereada Corp warrants to the original purchaser that the products are free of defects in workmanship, production, and materials, during the applicable warranty period. If you received the brand new mat as a gift, please, contact us within 30 days to activate your warranty. After the warranty expires, we will still take care of any repairs, at minimum cost.

TAKING CARE OF YOUR MAT

1. The mat should not be used outside if you are not sure about the weather. Use it indoors on a flat face as a massage table, bed, sofa, mattress or floor. It’s ok if the surface is not ideally hard and flat as a board.

2. Only the Ereada® mini mats (pads) can be bent up to ninety degrees to slightly wrap your body, for a chair or recreation while heating. It is preferable to use the mini mat without N.P. for chair or heating in bent condition.

3. Sometimes controllers and even mat issues happen after power spikes. When a power surge occurs, the high voltage power is not going to use your mat for a while, or if you are leaving your home for a weekend or vacation it is better to unplug the controller from the socket. The best is to keep the controller plug unplugged from the power socket always while it is not in use.

4. No need to unplug the controller’s connector from the mat’s connection terminal frequently. If the controller remains connected to the mat, it is OK as it only helps prevent the connection from loosening. Just remember to verify the tightness of the connection from time to time, especially if you sleep on your mat. If you have to disconnect the plug of the controller from the mat connection terminal, always do this carefully and with both hands. Hold the controller plug by the cable and pull it to the mat. If you pull it from the controller’s plug by the cable, it can break, or the connection may eventually become loose, and the mat will not work correctly.

5. Please, take care of your mat, and it will be your partner for a long time. Amethyst mattress is excellent for meditation, sleeping, massage and healing sessions if laying calm on it without a pad, blanket, or your body on it, the heat dissipates, and the mattress will not be hot. If you apply pressure or step on it, the stones may become loose. Try not to bend a firm mat in bent condition.

6. If you received the new mat as a gift, please, contact us within 30 days to activate your warranty. After the warranty expires, we will still take care of any repairs, at minimum cost.

WARRANTY

- All Ereada® products are marketed for consumer home use. The customer holds ultimate responsibility for any use of the device or information and for all consequences. Ereada Corp assumes no responsibility for the improper use of and self-diagnosis and/or treatment using the products. You fully understand that you are responsible for the use and the customer holds ultimate responsibility for any use of the device or information and for all consequences. Ereada Corp assumes no responsibility for the improper use of and self-diagnosis and/or treatment using the products.

- Information provided hereby is for reference purposes only and is not intended to recommend our devices as a drug or as a diagnosis for any illness or disease condition; nor as a product to eliminate disease or medical conditions, or can be a replacement of doctor’s advice or prescription medicines any harm may have. This is for your consideration and it is your responsibility to consult a health professional before use of Ereada® products. Specific medical advice should be obtained from your doctor or other health professional. Ereada products are non-medical, non-medical devices and are not intended to diagnose, treat, cure, mitigate or prevent any disease, symptom or condition. 9. Do not store the mat vertically along the wall. Store the device in the bag provided. Consider storing the controller and plug separately so that the sharp edge of the power socket plug does not damage the mat’s soft leather, mesh or suede surface. Do not store the device in a humid, dusty or oily place. Store it in a clean, ventilated storage room or closet.

10. If you received the new mat as a gift, please, contact us within 30 days to activate your warranty. After the warranty expires, we will still take care of any repairs, at minimum cost.

- Shipping and return shipping are both free for warranty issues.

- You can also buy an extended home or professional use warranty. To activate warranty or purchase an additional one, please, contact us at Ereada@Ereada.com.
