

CENTER CONSOLE RADIO MOUNT 110 WATT

INSTALL

GEN 3 RAPTOR (2021 - 2023)

Step 1:

Remove foam liner in bottom of center console.

Step 2:

Drill holes for passing antenna coax cable, power cable, and remote mount speaker cable through.

We recommend drilling a $\frac{3}{4}$ " hole in the back wall near the bottom corner by the drivers seat, and then a second smaller hole attached to it for passing wires through easily.

CENTER CONSOLE RADIO MOUNT 110 WATT

INSTALL

GEN 3 RAPTOR (2021 - 2023)

Step 3:

Attach brackets to your 110 watt radio as shown in pictures. Attach the radio head to the vertical brackets, then manage and secure the cable for the remote mount head using zip ties for a clean install.

CENTER CONSOLE RADIO MOUNT 110 WATT

INSTALL

GEN 3 RAPTOR (2021 - 2023)

Step 4:

It is easier to run the wires into the center console before installing the radio, but not necessary.

Step 5:

Install the radio into your center console with the remote head towards the front of the truck. The Radio should center itself in the console, then secure down to the bottom of the console using the supplied screws. Two per side.

Step 6:

Plug in the coax, power and remote speaker wire.

Step 7:

Enjoy your new radio, the mic chord and be run out through one of the notches under the center console lid so it doesn't get pinched and damaged.
