Side Protection: Mesh Curtains

In order to prevent dangerous situations for personnel, children, others, for example when the operator has not a clear view of all the travel zone from a remote control, the lift table must be provided with screens, safety guards or flexible guards on open sides.

According to EN 1570-1 5.2.2: Protection of the travel zone

Table 3 - Lift Installation safeguard requirement Lift Category G1 to G8. Consult Factory for assistance.

Supplied on request on one or more sides of the table. Galvanized mesh.

Important! Note additional clearance between the top platform and the lower frame is necessary to fit each mesh.

Note: In any case the top platform width is to remain central to the lower base frame width, even in the case of screening to one long side only.
