Safety Gates

Where access through the handrails is required, a gate should be fitted (EN 1570-1 5.2.10.11); when gates are outwards opening it is required an electro mechanical interlocks to prevent the lift table to move when gates are not closed; the gates can open only when the table is level with permanent level (EN 1570-1 5.2.11).

Available:

- Bolted Single gate
- Bolted Bi-parting gate
- Electro mechanical lock
- Inward opening gate(s)
