## **Manual Rectangular Turntable**

It allows 360° rotation of the load in both directions making handling and assembling operations easier. The upper rotating platform is also provided with safety perimeter trip bar. Equipped with a manual block device to be fitted on the top platform to prevent unintentional rotation when lowered.

Limit switch allowing the movement of the table only when the two platforms are parallel available as option. Rotation mechanical lock new design fitted on platform side (central position on MX) on request. It allows a more comfortable operation with the advantage to have all the surface free to receive and handle the load.

**Price on request.**

Models available only for Range Green Line 1.E
