## Fork Extension Slippers

Quick and easy to fit, our fork extension slippers are designed to extend the forklifts reach allowing long or out of reach loads to be handled. Fork extension slippers help save time loading trucks as they enable the forklift to reach across the truck deck, meaning the truck can be loaded from one side. They are also used for picking up two pallets at once or handling larger loads.

AS 2359.15 requires the fork length to be a minimum of 60% of length of the fork extension slippers.

### Specifications:

- High Safe Working Load Rating.
- Made from high tensile grade steel.
- Zinc plated for corrosion protection.
- Supplied with toggle locking pins.
- Fitted with rating plate.
- Supplied with manual instructions.
- Other sizes manufactured to order.
- Manufactured strictly in accordance with AS 2359.15.
- Safe weight load per pair at 600 mm load centre:
  - FS 01 series = 3,000 kg
  - FS 02 series = 4,500 kg
  - FS 03 series = 6,500 kg
  - FS 04 series = 8,500 kg
