## **Fork Spreader 3000 kg FJA-19-628**

Fork spreaders have been designed to safely lift extra wide or flexible loads. These fork spreaders help to prevent goods such as roof sheets, timber or plasterboard becoming damaged when moving them as the load is evenly distributed over the length of the attachment. This slip-on attachment is simple to use and is secured to the forklift with a safety chain. Used to stabilize wide loads of unstable products such as gyprock, steel bar or pipe that is manufactured and supplied in long random lengths. The fork mounted spreader beam slips into the forks of any standard forklift quickly, adding stability to the load by means of a rigid beam carrying two extra forks. When elevated, the load acts as a single unit, eliminating any sag that could cause products to fall.

### **Specifications:**

- Capacity: 3000 kg at 600 mm Load Centre.
- Width: 5156 mm.
- Pocket Size: 160 x 60 mm.
- Pocket Centres: 770 mm.
- Horizontal Centre of Gravity: 300 mm.
- Vertical Centre of Gravity: 60 mm.
- Unit Weight: 260 kg.
- Manufactured strictly in accordance with AS 2359.1.
