

Unique solution for hospitals!

It is a fact that today's hospitals face many challenges to ensure patient and workforce safety. With the specially developed Logitilt, you can lift and tilt hospital beds ergonomically and safely!

Around the clock, hospitals need to focus on:

Top ergonomics and safety

By tilting the hospital beds, you get an easy access to the bottom side of the beds - and thus ergonomically correct working conditions to the hospital workforce.

The Logitilt has adjustable forks to be able to fit different types of hospital beds. Special clamping devices are developed to fix the hospital beds during lifting and tilting.

Top hygiene and maintenance

Preventing infections and ensuring a clean environment is of utmost importance at the hospitals. By tilting the hospital beds, you achieve easy access to clean the bed bottom, frame and the electric motor. In addition, the wheels of the bed can easily be exchanged and maintained.
