## **Reefer Container Ramp**

### **Heavy Duty 8,000 kg**

This refrigerated (reefer) container ramp bridges into a reefer container from the ground level. The flaps mean that the container ramp does not have to be butted completely flush with the container. Heavy duty and built for the harshest conditions, with fork pockets on three sides for ease of relocation.

#### **Specifications:**

- Safe Working Load: 8000kg.
- Width: 2200 mm.
- Length: 2025 mm.
- NZ Made product.
- Can be customised.
- Heavy duty boxing / reinforcement.
- 8 mm steel chequer top plate.
- Painted finish.
- Fork pockets can be accessed from 3 sides.
- Manufactured strictly in accordance with AS 3990.
