Roll Prongs Slip-On

These prong attachments are designed to easily move fabric, carpet, cable and coil products on site. We recommend using large forklifts as the length of the prong extends the load centre significantly. These attachments fit on most standard forks requiring only the connection of the safety chain (included) to prevent unintentional disengagement. Prongs are manufactured from high tensile steel. Includes instruction manual and manufacture certificate.

- Safe Working Load – refer chart below.
- Lost Load: 1040 mm.
- Pocket Size: 190 x 65 mm.
- Unit Weight: refer chart below.
- Galvanised finish.
- Refer chart for all other specifications.
- Manufactured strictly in accordance with AS 2359.1.
