## **Standard Container Ramp**

### **Heavy Duty 8,000 kg**

These container ramps are designed for forklift access into standard containers from ground level. Constructed with an 8 mm thick plate and 10 mm folded ribs beneath. They are built to last in a high use environment. The chequered tread plate decking provides grip in wet conditions. The 3.0 m ramp is great for very high packed loads where the forklift must be level to remove the product. It also has extra fork pockets entry on the sides as well as the front.

**Specifications:**

- Safe Working Load: 8000kg.
- Width: 2270 mm.
- Made from 8 mm chequer plate, 10 mm ribs on underside to reduce bowing and distortion.
- Finished in safety yellow.
- Manufactured strictly in accordance with AS 2359.1.
