Engage your baby and boost your child's development!

#mysnuggbugg

According to studies, babywearing brings many benefits to baby and mom. We thought you'd like to know more about these benefits. Here are some of them:

Show them how much you love them and keep them close. Interacting with your baby is a joy for the family, and a precious developmental tool!

Babies feel safe in babywraps and get more interaction while being carried. Did you know that they learn by observing? A protective and safe environment is the best atmosphere for the little ones to learn!

Touch . Smile • Feel • Play

These are the best ways to raise a confident, independent and happy child!

The special closeness you share with your baby will make him feel more competent and confident.

Babywearing regularizes the baby's biorhythms and it decreases the stress hormones in baby and mom.

This makes babies cry less during the late hours and helps moms overcome postpartum depression.

What if we told you that you could hug your baby hands-free?

You can carry your baby and look after other children or do other chores simultaneously.

Hold your baby close to your heart!

Thank you for your purchase!

Please read the following important safety guidelines and check on your baby frequently

- Make sure your baby is breathing at all times.
- Baby's chin must be off chest and face must be visible.
- Baby's nose and mouth must be free.
- The "belt" section must hold baby's entire back and shoulders.
- The baby must be seated with knees up above bottom.
- Load Capacity: 35 lbs

What to Do

- Only untie when baby is already out of wrap.
- Place one baby in the wrap at a time.
- Tie the baby wrap properly.
- Use your common sense at all times.
- You are the one responsible for the safety of your baby. Use your best judgment to keep your baby safe and secure!

What not to do

- Do not use this babywrap for a back carry.
- Do not use this babywrap when in a car or while riding a bike.
- Do not place baby in a forward position when wrapped.
- Do not get involved in recreational activities such as jumping, running, jogging, riding a bike etc. The baby is developing his neck, spine and brain. In such stage your little one doesn't need so much body movement at all.

Wearing instructions

- 1 – Center the babywrap in front of your stomach.
 - 2 – Make an "X" on your back, bringing the ends over the shoulders to the front.
 - 3 – Tuck both ends under the "belt" section, making another "X".
 - 4 – Make another "x" on your back.
 - 5 - Tie the ends either on your side or in front of you.
 - 6 - Tuck one of your baby's leg carefully in one side of the front "X", spreading the fabric all over baby's bottom and shoulder.
 - 7 - Tuck the other baby's leg in the other side of the front "X".
 - 8 - Pull the "belt" section up over baby's back and shoulders.
- The best leg's position for newborns and babies up to 3 months is inside the babywrap. For babies 3 months and above place their legs outside the babywrap.

Care Instructions:

Machine wash gentle. Do not bleach. Do not iron.
Material: 95% cotton, 5% spandex
