

WSRD 2020 Turbo RR Stock Injector Tune Details

WS195RR Tune Features:

- Boost pressures are increase up to 21-22.5 PSI respectively for the octane you choose to run. Crack pressure set to 10 PSI.
- Radiator fan activation temp lowered from ~205* F to ~185* F
- Intercooler fan activation temp lowered from ~140* F to ~95*F
- Torque limits for L raised to 100%, reverse raised to 75%
- Component protection mode for fueling lowered to increase torque and horsepower, especially right after the pedal is floored.
- Ignition timing per cylinder is optimized for maximum power as well as drive-ability, careful consideration was used not only for when at wide open throttle, but as well as cruise, throttle transitions, etc..
- Throttle feel and control is thoughtfully improved, to control through a whoop section, on/off feel in short course style racing or playing in the woods, eco mode is improved but offers the less aggressive pedal for technical rock sections or simply loading on a trailer.
- Speed limits removed, your speed limit is your rev limiter/gear
- Rev limiter raised to 90000 RPM
- Rough road detection is raised to max to prevent power loss.
- Includes a 91 octane, 91 octane high elevation, and a 93 octane file.

Clutching Options: (please select the additional link below to add your recommended clutching option)

- KWI Clutching AO Base + #4 Helix
- WSRD Spec STM Powersports Rage 4WCP Primary

Spark Plug Options:

- OEM NGK Spark Plug
 - OEM Part Number: 415130363
 - NGK Part Number: LMAR9AI-8
 - Auto Parts Store Number: 97225
- WSRD Spark Plugs

Drive Belt Options:

- **BRP Drive Belt: 422280652**
- **WSRD World's Best Drive Belt**

Package Options:

- **WSRD Catch Can Kit**
- **WSRD PV3 Mounting Arm**
- **WSRD 10" Fan Shroud Assembly**
- **WSRD Terminator Intercooler**
- **WSRD Exhaust Systems**
- **RPM SxS Downpipes & Exhaust Systems**
